PREFACE.

SURROUNDED by the voluminous medical publications of the times, the busy practitioner is often at a loss to select from the mass of material at his disposal, without monopolizing time that he can ill afford to spend in this way, that combination of therapeutical agencies which the experience of the most learned, successful and best trained medical minds of the age has proven is best adapted to meet the indications for treatment in well known conditions of disease. The author has striven, in this presentation of favorite prescriptions and practical points in treatment, to place before the profession for constant reference, in a condensed, readily accessible way, matter that could only be gleaned from careful study and association with the medical writers and teachers of the times.

No pretence of originality is made. The book is essentially a compilation. It is, however, a book which it is believed will be eminently useful. The design of the writer will have been accomplished if he succeeds by his offering in rendering more available for every-day use and guidance the practical treasures of medical wisdom which have been gathered from the earnest labors and careful observations of the most distinguished practitioners of the age.

BOSTON MEDICAL
MAR 31 1926
LIBRARY ASSN.

DISEASES OF THE NOSE, THROAT, MOUTH AND CHEST.

Pneumonia.

℞ Ammoniæ muriatis..... 3 iij.
Antim. et pot. tartrat.....gr. ij.
Morphiæ sulphat.....gr. iij.
Syrupi glycyrrhizæ..... ℥ iv.
M. Sig.—A teaspoonful every two hours.

Dr. N. S Davis.

℞ Hydrarg. chlor. mitis.....
Ipecac. pulveris.....aa gr. vj.
Opii pulveris.....gr. iij.
Sacchar. alb.....gr. xxx.
M. Ft. chart. vj.

Sig.—One powder every four hours alternately with the preceding prescription. At the same time cover the chest with emollient poultices.

Dr. N. S. Davis.

Where a typhoid condition of the system is associated with the pneumonia, bleeding is not well borne. In these cases Dr. Davis has obtained admirable results by the use of the preceding prescriptions.

At the end of twenty-four hours he omits the powders, and if the bowels have not been moved he gives a mild laxative. If the symptoms are not favorably

modified in 3 or 4 days, a blister is placed on the side of the chest most affected.

Should the pulse become soft and frequent, the breathing abdominal and the lips of a leaden hue,

℞ Quiniæ sulph.....gr. ij.
Ammon. carbonat.....gr. iv.

M. Sig.—Take at a dose. If delirium becomes troublesome add 10 minims of chloroform to the ammonia mixture. If there is indication of malarial influence, quinine may be given during the remissions.

Sub-Acute Pleurisy.

℞ Potas. acet.....
Inf. digital.....aa ʒ ij-iv.
Sig.—This amount each day; or
℞ Pulv. digital.....
Pulv. scillæ mar.....
Hydrarg. chlo. mit.....aa gr. x.
M. Et. ft. pil. No. x.
Sig.—One pill thrice daily.

Dr. Alonzo Clark.

The indications for treatment are to subdue the inflammation and promote absorption of the effused fluid. Dr. Clark, to accomplish the first of these effects, uses blisters, three being usually sufficient, selecting three spots and applying only one blister at a time, the second and third not being placed in position until the spot of former application has healed. As a diuretic he uses potassii iodidi xxx grs. a day; if this fail to diminish the fluid, he has resource to the above formulæ. If constitutional effects of mercury

declare themselves he returns again to the potassii iodid. Dr. Clark uses other means, as purgatives, vapor baths, and mild counter-irritants when he thinks them indicated, but, having exhausted all medical means without effect (as is sometimes the case), he either resorts to the trocar or does nothing.

Asthmatic Fits of Emphysema.

℞ Tinct. opii..... ʒ j.
Ætheris..... ʒ ij.

Sig.—Sixty drops every twenty minutes. To each dose may be added:

Tinct. lobeliæ ætheræ.....gtt. xx.

Meridith Clymer, M.D.

This formula has often yielded relief in these sudden attacks of asthma when all other means have failed.

Diuretic in Cardiac Dropsy.

℞ Infus. digital..... ℥ iijss.
Acet. scillæ..... ℥ ss.

M. Sig.—A tablespoonful two or three times a day.

Barthelow.

Diphtheritic Croup.

℞ Potassii chloratis..... ʒ ij.
Syrupi limonis..... ℥ j.
Aquæ..... ℥ iij.

Dose according to age of child. If under two years, a teaspoonful; from two to ten, two teaspoonfuls;

over ten, a tablespoonful, given every three hours or every half hour in urgent cases.

Recommended as almost specific in diphtheritic croup by *Dr T. M. Drysdale.*

In Asthmatic Paroxysm.

℞ Tinct. lobeliæ..... ℥ j.
Ammon. iodidi..... 3 ij.
Ammon. bromidi..... 3 iij.
Syr. tolutan..... ℥ iij.

M. Sig.—A teaspoonful every one, two, three or four hours. *Dr. Roberts Bartholow.*

Of this prescription Dr. Bartholow says: "It gives relief in a few minutes, and sometimes the relief is permanent.

Emphysema.

℞ Potass. chlorat..... 3 jss.
Tinct. belladonnæ..... ℥ jss.
Ext. pruni virg. fluid.....
Tinct. cinchonæ co.....aa ℥ ij.

M. Sig.—A dessertspoonful four times a day.

Dr. Da Costa.

Where the emphysema is accompanied by chronic bronchitis and loss of appetite, Dr. Da Costa has found the above prescription the most efficient. He advises also that dry cups be applied to the chest night and morning.

In Bronchial Catarrh.

℞ Acet. scillæ..... ℥ ss.
Ext. ipecac. fl..... 3 ss.

Tinct. opii deodorat..... ℥ j.
Syr. tolutan..... ℥ x.
M. Sig.—A teaspoonful every two, three or four hours. *Bartholow.*

In Spasmodic Asthma.

℞ Potass. bromid... ..... ℥ j.
Potass. iodid.. ..... ℥ ss.
Aquæ..... ℥ iv.
M. Sig.—A teaspoonful in sufficient water every half hour or hour. *Dr Bartholow.*

In Chronic Phthisis.

℞ Syr. hypophos. comp..... ℥ iijss.
Acid phosphor. dil..... ℥ ss.
M. Sig.—Teaspoonful three times daily.
Dr. Roberts Bartholow.

The above combination is held by Dr. Bartholow to be very effective therapeutically; it may be advantageously given with cod liver oil, after meals, in chronic phthisis, or the following may be given when the effects of arsenic also are desired:

℞ Syr. calcii lacto-phos..... ℥ iv.
Liq. potass. arsenitis..... ℥ j.
M. Sig.—A dessertspoonful ter die.
Dr. Bartholow.

Acute Catarrh.

℞ Tinct. iodinii..... ℥ ss.
Acid carbolic..... ℥ j.
M. Sig.—Place a small, wide-mouthed bottle, con-

taining a moistened sponge, in a vessel of hot water; drop five to ten drops of the solution on the sponge and as the iodine vapor ascends with the vapor of the water, inhale it. *Bartholow.*

In Summer Catarrh or Hay Asthma.

℞ Potass. iodid..... ℥ j.
Liq. Potass. arsenit..... 3 j.
Aquæ..... ℥ iv.
M. Sig.—A teaspoonful every four or six hours.

This, given internally, combined with the local use by means of a post nasal syringe of the following formula, will often effect a cure in this obstinate malady:

℞ Tinct. iodinii..... 3 j.
Acid. carbol.....gtts. x.
Aquæ destillat..... ℥ iv.
M. Sig.—Apply with a post nasal syringe.
Bartholow.

In Acute Coryza and Hay Asthma.

℞ Brominii..... 3 ss.
Alcoholis..... ℥ iv.
M. Sig.—For inhalation. *Bartholow.*

A small quantity may be placed in a wide-mouthed vial and vaporized by the warmth of the hand. The vapor should be snuffed into the nose.

In Chronic Throat Affections.

℞ Acid. tannici..... 3 ii.
Spts. vini rect..... 3 i.
Mist. camph.....ad ℥ x.
M. Sig.—As an astringent gargle. *Bartholow.*

In these throat affections the above as a gargle, combined with a spray of a solution of tannin, 3 grs. to the ℥ is of great benefit.

Chronic Bronchitis, Emphysema, Spasmodic Asthma, Hay Asthma, and Phthisis.

℞ Potass. arsenit.....gr. xv.
Aquæ destillat.....℥ j.

Take unsized white paper, thoroughly moisten it with this solution, dry and cut into twenty equal parts and roll each part into a cigarette. Two or three of these are to be smoked daily, inhaling the smoke. *Trousseau.*

The above is also found very beneficial in acute and chronic coryza.

In Chronic Bronchitis.

℞ Ext. eucalypt.....℥ j.
Ammon. muriat.....ʒ ij.
Ext. glycyrrhizæ.....℥ ij.
Syr. tolu.....℥ iij.

M. Sig.—A tablespoonful four or six times a day.
Bartholow.

This forms an excellent expectorant in cases of chronic bronchitis and bronchorrhœa.

Chronic Bronchitis.

℞ Ammonii chloridi.....ʒ ij.
Mist. glycyrrhizæ co.....ʒ iij.

M. Sig.—A dessertspoonful three times a day.
Dr. Da Costa.

This formula is adapted for those cases of bronchitis accompanied by chronic catarrh in old persons.

Acute Bronchitis.

℞ Vini ipecacuanhæ..... 3 ij.
Liq. potassii citratis..... ℥ iv.
Tinct. opii camphoratæ.....
Syrupi acaciæ.....aa ℥ j.

M. Sig.—A tablespoonful thrice daily in the first stage of ordinary acute bronchitis. *Dr. Da Costa.*

This union of the sedative effects of opium with the excito-secretory action of the ipecacuanha on the congested mucous membrane has been found very serviceable.

Aphthæ of Phthisis.

℞ Quiniæ sulph.....gr. j.
Olei piperis nigris.....gtt. j.
Aquæ..... ℥ j.

M. Sig.—May be applied with a brush, or mouth rinsed with it. This is the wash in use at Roosevelt Hospital, and is at the same time antiseptic and stimulant.

In Mercurial Salivation.

℞ Acidi tannici..... 3 i.
Mel. rosæ..... ℥ ij.
Aquæ..... ℥ vj.

M. Sig.—As a gargle. *Bartholow.*

Whooping Cough Mixture.

Infants' Hospital, Randall's Island, N. Y.

℞ Acid. nitric. dil.....fl. ʒ i.
Syr. pruni virg.....fl. ʒ ½.
Aquæ q. s. ad.....fl. ʒ 2.
Mix. Dose: a teaspoonful.

Whooping Cough Mixture.

Outdoor Department of Bellevue Hospital, N. Y.

℞ Tinct. nucis vom.....fl. ʒ 2.
Vin. ipecac.....fl. ʒ 2½.
Syr. sarsap. co.....
" senegæ.....aa fl. ʒ 1½.
Mix. Dose: a teaspoonful, for children.

Dr. Ackermann.

Letzerich's Treatment of Diphtheria by Benzoate of Soda.

℞ Sodæ benzoat, pur.....ʒ j.
Aquæ destillat.....
Aquæ menth. pip.....aa ʒ j.
Syrup cort. aurantii.....ʒ ij.
M. For an infant under one year old, one-half tablespoonful every hour.

For Hemorrhages.

℞ Acidi gallici.....ʒ j.
Glycerini.....ʒ ss.
Aquæ destillat.....ʒ vj.
M. Sig.—Two tablespoonfuls three times a day.

Farquharson.

In Mitral Regurgitation and in Dilatation of the Cavities of the Heart.

℞ Ferri redacti.....
Quiniæ sulphat.....
Pulv. digitalis.....aa ℈ j.
Pulv. scillæ.....gr. x.
M. Ft. pil. No. xx.
Sig.—One pill three or four times a day. *Bartholow.*

This prescription is especially serviceable in those cases of dilatation accompanied by cough, difficult breathing and general dropsy, and is of more value in such cases than so called cardiac sedatives and diuretics.

In Chronic Heart Disease.

℞ Pulv. digital.....gr. xxx.
Fer. sulph. exsiccat.....gr. xv.
Pulv. capsici.....gr. xl.
Pil. al. et myrrh..... ʒ ij.
M. Ft. pil. No. lx.
Sig.—One twice a day. *Fothergill.*

This is indicated in the following condition so frequent in heart disease, viz.: Where gastric catarrh, copious eructations of wind and inactivity of the bowels are associated with the cardiac debility.

Mixture of Digitalis and Iron for Cardiac Weakness with Dilatation of the Ventricles.

℞ Tr. ferri perchlorid..... 3 ij.
Syr. zingiberis..... 3 vj.
Inf. digitalis..... ʒ v.
M. Tablespoonful three times daily.

Bell's Gargle.

℞ Sodii biboratis.. ..... ʒ 2.
Fermenti.....
Mellis.....aa ʒ ½.
Aquæ q. s. ad.....fl. ʒ 8.
Mix.

In Cardiac Debility with Scanty Flow of Urine.

℞ Tinct. digitalis.....ɱ x.
Sp. æther nit.....ʒ ss.
Inf. buchu.....ʒ j.
M. Sig.—Three times a day. *Fothergill.*

This is a pleasant combination and may have citrate of potash added to it with advantage, or if there is much debility with the heart disease, or it is associated with atonic gout, the following will prove very efficacious:

℞ Pot. bicarb.....gr. x.
Fer. am. cit.....gr. v.
Tinct. digitalis.....ɱ x.
Inf. buchu.....ʒ j.
Sig.—Three times a day, followed by draught of water.

Influenza.

℞ Ac. phos. dil.....M. xv.
Spt. chloroformi.....M. xxv.
Syr. scillæ.....ʒ j.
Aquæ.....ad. ʒ j.
M. Sig.—Four or six times every twenty-four hours.
Fothergill.

This will form an efficient expectorant, free from depressant effects in epidemic catarrh. In the convalescent stage where a tonic is also desired the following is very acceptable:

℞ Acid nit. dil.....M. x.
Sp. chloroformi..... 3 ss.
Inf. cinchonæ..... ℥ j.

Sig.—Three or four times a day. *Fothergill.*

In Ulcerated Mouth or Gums or Mercurial Salivation.

℞ Potass. chloratis..... 3 j.
Aquæ..... ℥ vi.

Two tablespoonfuls three times a day as a gargle.
Farquharson.

Acute Pleuritis.

℞ Tinct. aconit. rad..... 3 ij.
Tinct. opii deodorat..... 3 vj.

M. Sig.—Eight drops in water every hour or two.
Bartholow.

In acute pleuritis, before the stage of effusion has set in, no more effective combination will be found than the above.

Enlarged Heart Without Valvular Lesion.

℞ Ext. ergotæ fl..... ℥ iijss.
Tr. digitalis..... ℥ ss.

M. Sig.—A teaspoonful three times a day.
Bartholow.

A Stimulating Expectorant.

℞ Am. carbonat.....gr. v.
Tinct. nuc. vom.....m. x.
Tinct scillæ.....℥ ss.
Inf. serpentar.....℥ j.
M. Sig.—Three times a day. *Fothergill.*

In those cases in which chronic bronchitis is associated with emphysema, or in the second stage of acute bronchitis, where the heart is severely taxed, this combination of remedies will strengthen the over-taxed heart and clear out the air passages.

Acute Catarrh.

℞ Antim. et potass. tart.....gr. ss.
Morphiæ acetat.....gr. ss.
Aquæ.....℥ ij.
M. Sig.—A tablespoonful every hour or so.
Dr. Barthelow.

This is advised in the first stage of catarrh when the mucous membrane is dry and swollen.

Hæmoptysis.

℞ Plumbi acetat.....ʒ ij.
Pulv. digital.....ʒ j.
Pulv. opii.....gr. x.
M. Ft. pil. No. xx.
Sig.—One every four hours.
Dr. Roberts Bartholow.

Caseous Pneumonia.

℞ Inf. digital. ..... ℥ iv.
Plumbi acetat. ..... ʒ j.
Tinct. opii. ..... ℥ j.
M. Sig.—A teaspoonful twice a day.

Dr. Oppolzer.

Coryza.

℞ Pulveris aluminis. ..... gr. v-xxx.
Aquæ. ..... ℥ j.
M. Sig.—To be drawn into the nostrils three or four times a day in the form of spray.

J. Solis Cohen, M.D.

This spray will diminish the profuse secretion and destroy the fœtor incident to coryza.

Expectorant Mixture for Children.

Outdoor Department of Bellevue Hospital, N.Y.

℞ Syr. senegæ. .....
" pruni virg. .....
" acaciæ. ..... aa fl. ℥ i.
M. Dose: a teaspoonful. *Dr. Holgate.*

Expectorant Mixture.

Insane Asylum, Blackwell's Island, N.Y.

℞ Spts. etheris co. .....
Syr. ipecac. .....
Tinct. opii camph. .....
Aquæ. .....
} Equal parts of each.

M. Dose: a teaspoonful.

Cough Mixture.

Outdoor Department of Bellevue Hospital, N. Y.

℞ Syr. tolut.
Syr. pruni. virg.
Tr. hyoscyami. } aa fl. ℥ j.
Spts. etheris com.
Aquæ.

M. Sig.—Dose: a teaspoonful.

Prof. E. G. Janeway.

℞ Acid hydrocyan dil. ..... ʒ i.
Tinct. sanguinariæ. ..... ʒ iv.
Syr. senegæ. ..... ℥ ss.
Syr. tolutan. ..... ℥ ij.
Aquæ lauro-cerasi. ..... ʒ vij.

M. Sig.—One or two teaspoonfuls, according to age, every three or four hours. *Dr. Bartholow.*

This formula is most successful in treating the cases of cough by habit after the cessation of the whooping cough proper. It is also very useful in allaying the nervous cough of mothers which exists during the presence of cough in the household.

Expectorant Mixture.

Charity Hospital, Blackwell's Island, N. Y.

℞ Tinct. sanguinar. ..... fl. ʒ i
Tinct. opii camph.
Syr. scillæ.
Syr. tolut. ..... aa fl. ʒ ss
Aquæ q. s. ad. ..... fl. ℥ ss

Mix. Dose: a teaspoonful.

Misce. Ut fiat lotio. *Sir W. Jenner.*

In Dropsy of Emphysema.

℞ Aceti scillæ..... ℥ j.
Potass. carb. ad saturationem.....
Aquæ destil.....℥ vj.

Misce. A tablespoonful every two hours.
Niemeyer.

II.

DISEASES OF THE ABDOMINAL VISCERA.

In Lead Colic.

℞ Aluminis..... 3 ij.
Acid sulph. dil..... 3 j.
Syr. limonis..... ℥ j.
Aquæ..... 3 iij.

M. Sig.—A tablespoonful every hour or two.

Bartholow.

Will relieve the violent pains of painter's colic.

Rum Stomach.

℞ Tinct. nucis vomicæ.....grs. v-xv.
Tinct. gentianæ co.....
Tinct. columbæ co.....aa 3 j.

M. Sig.—Take before meals.

Dr. Alfred L. Loomis.

This is advised in those cases of rum stomach accompanied by gaseous distension of the bowels and stomach. We may also advantageously give a mercurial or aloetic purge.

Gastric Catarrh.

℞ Aluminis.....3 ij.
Ext. gentian.....3 ss.

M. Ft. pil. No. xxx. Sig.—Two pills three times a day. *Dr. Bartholow.*

This formula is held to be most effective when there is vomiting of glairy mucus from the stomach.

West's Mixture.

℞ Ol. ricini.....fl. ʒ 2
Pulv. acaciæ.....
Pulv. sacchari.....aa ʒ 2
Tinct. opii.....m. 21
Aquæ cinnam. q. s. ad.....fl. ℥ 4

Mix. Dose: a teaspoonful, for children, in diarrhœa.

Opium, Rhubarb and Camphor.

Outdoor Department of Bellevue Hospital, N. Y.

℞ Tinct. opii.....
Tinct. rhei arom.....
Spts. camphoræ.....aa fl. ʒ ½
Tinct. cardam co.....fl. ʒ 2
Aquæ anisi q. s. ad.....fl. ℥ 4

Mix. Dose: a tablespoonful, for children, in diarrhœa. *Dr. Swezey.*

Hot Drops.

Charity Hospital, Blackwell's Island, N. Y.

℞ Tinct. opii.....
Tinct. capsici.....
Spts. camphoræ.....
Spts. menthæ pip.....
} aa fl. ʒ 2

Aquæ.....fl. ℥ 1

Mix. Dose: a teaspoonful.

Cholera Morbus.

℞ Chloral hydratis..... 3 iij.
Morphiæ sulphatis.....gr. iv.
Aquæ laurocerasi..... ℥ j.

M. Sig.—From fifteen to twenty minims injected hypodermically for cholera and cholera morbus.

Roberts Bartholow, M.D.

This injection may produce considerable burning pain and an indurated lump, but it is considered by Dr. Bartholow to be the most effective remedy known for relief of cholera, etc., the patient not infrequently being wrested from a condition of extreme danger.

Habitual Constipation.

℞ Ext. stillingiæ fl..... 3 v.
Tinct. belladonnæ.....
Tinct. nucis vomicæ.....
Tinct. physostigmæ.....aa 3 j.

M. Sig.—Twenty drops in water three times a day before meals. *Bartholow.*

Acute Dysentery.

℞ Cupri sulph.....gr. ss.
Magnes. sulph..... ℥ j.
Acid sulph. dil..... 3 j.
Aquæ..... ℥ iv.

M. Sig.—A tablespoonful every four hours.

Dr. Roberts Bartholow.

Chronic Diarrhœa.

℞ Bismuthi subnitratis.....gr. v.
Morphiæ sulphat.....gr. ½.

M. Sig.—This much two or three or more times daily. *Dr. Alonzo Clark.*

This formula will often afford relief in these cases, though the influence of proper diet and change of surroundings should also be considered in treatment.

Constipation.

℞ Tinct. nucis vomicæ.....
Tinct. belladonnæ.....
Tinct. physostigmæ.....aa ʒ ij.

M. Sig.—Thirty drops in water morning and evening. *Dr. Bartholow.*

Where constipation is due to torpor of the muscular layer of the intestine, combined with deficient secretion of the mucous membrane, this formula is often very serviceable, or the following may be taken:

℞ Ext. physostigmæ.....
Ext. belladonnæ.....
Ext. nucis vomicæ.....aa gr. v.

M. Ft. pil. No. 10. Sig.—One pill at bed hour. *Bartholow.*

Diarrhœa.

℞ Tinct. colombæ.....ʒ xv.
Tinct. opii deodor.....ʒ j.

M. Sig.—A teaspoonful in a wineglassful of water, before meals. *Bartholow.*

This formula is best adapted to a condition such as the following, viz.:

Soon after taking food, *pain* referable to small intestine, nausea, loose evacuations containing undigested aliments and followed by weakness and depression.

In First Stages of Cirrhosis.

℞ Ammon. iodid..... ℥ j.
Liq. potass. arsenit..... ℥ ss.
Tinct. colombæ..... ℥ ss.
Aquæ..... ℥ jss.

M. Sig.—A teaspoonful three times a day before meals. *Bartholow.*

Diarrhœa Mixture.

℞ Tinct. opii.....
Tinct. capsici.....
Tinct. rhei arom..... } aa p. e.
Spts. menthæ pip.....
Spts. camphoræ .....

Mix. Dose: 20–40 min. *Dr. Ruschenberger.*

Compound Aloes Mixture.

℞ Aloes socotr..... ℥ 1
Sodii bicarb..... ℥ 1½
Glycerine.....
Spts. lavand co .....aa fl. ℥ 2.
Ol. menthæ pip.....m. 25
Aquæ.....Oi

Mix. Dose: one to two tablespoonfuls as a purgative; one to two teaspoonfuls as a stomachic and tonic.

Diarrhœa Mixture.

Hart's Island Hospital, N. Y.

℞ Tinct. capsici.....fl. ℥ i
Tinct. catechu.....
Tinct. kino.....
Tinct. krameriæ.....aa fl. ℥ 4
Tinct. opii.....fl. ℥ 3
Spts. menth. pip.....fl. ℥ 2
Spts. camphoræ.....
Aquæ.....aa fl. ℥ 4
Mix. Dose: 30–60 minims.

Diuretic Mixture.

℞ Spiritus juniperi..... ℥ ss.
Potass. acetat..... ʒ jss.
Spiritus ætheris nit..... ℥ j.
Decoc. scoparii (br)..... ℥ viij.
Dose: two tablespoonfuls three times a day.

Hyperæmia of the Kidney.

In addition to general hygienic measures, Prof. Montrose Pallen, M.D., advises the use of vaseline inunctions and sponging the surface with hot water and alcohol. The use of the hot air or Turkish bath, and the most easily digested and highly nutritious food, such as milk and kumyss. An aperient is to be given and a uniform temperature maintained by keeping the patient in bed. Massage is advantageous, stimulating the circulation. Should the symptoms of eclampsia come on, we must have recourse to chloroform and bleeding.

Gastralgia.

℞ Argenti oxidi.....grs. v.
Ext. hyoscyami.....grs. v.

M. Ft. pil. No. x. Sig.—One pill three times a day before meals. *Bartholow.*

This formula is indicated in cases where there is pain after taking food, lasting for an hour or more, burning pain with pyrosis coming on after the completion of the stage of stomach digestion, eructations of food, with sour and acrid matters.

Anti-Emetic Mixture.

Charity Hospital, Blackwell's Island, N. Y.

℞ Creasoti.....m. 12
Acid hydrocyan. dil.....m. 30
Pulv. acaciæ.....
" sacchari.....aa ʒ 6

Mix. Dose: ½ to 1 teaspoonful, two or three times a day, for children. *Dr. Squibb.*

Bicarbonate of Soda.

Outdoor Department of Bellevue Hospital, N. Y.

℞ Sodii bicarb.....℥ 1
Tinct. zingiber.....fl. 3 2
Tinct. gent. co.....fl. ℥ 1
Aquæ.....fl. ℥ 5
Mix. Dose: two teaspoonfuls.

Rhubarb and Soda.

Bellevue Hospital, New York.

℞ Sodii bicarbon..... ℥ i
Pulv. rhei..... ℥ ½
Spts. menthæ pip.....fl. ℥ ii
Aquæ q. s. ad.....fl. ℥ iv
Mix. Dose: a tablespoonful.

Rhubarb and Lime.

Outdoor Department of Bellevue Hospital, N. Y.

℞ Tinct. opii camph .....
Syr. rhei. arom.....aa fl. ℥ ½
Aquæ calcis.....fl. ℥ ii
Mix. Dose: a teaspoonful, for children, in diarrhœa. *Dr. Ackermann.*

In Gastralgia and Irritative Dyspepsia.

℞ Bismuthi subcarb..... ℥ iij.
Morph. sulph.....gr. j.
Pulv. aromat..... ℥ j.
Ft. pulv. No. xii. Sig.—A powder in milk before each meal. *Dr. Bartholow.*

The above will quiet the existing irritability and relieve the pain in these cases.

In Acute and Chronic Dysentery.

℞ Plumb. acetat.....grs. iv.
Morphiæ acetat.....gr. ss.
Aq. fervid..... ℥ j.
M. Sig.—Use as an enema.
Dr. Roberts Bartholow.

Chronic Interstitial Nephritis.

℞ Tinct. ferri chloridi.....m. x.
Syrupi limonis.....m. l.
Aquæ.....℥ iij.

M. Sig.—To be taken thrice daily in a wineglassful of water. *Dr. Da Costa.*

Patients in addition to the above means of medication, should be treated by a nourishing diet, a little wine is allowable, and as a matter of course, hygiene should be strictly attended to.

Uræmia.

℞ Acid benzoici.....gr. xx.
Syrupi tolutani.....℥ j.

Sig.—To be given every third hour, largely diluted with water. *Dr. Da Costa.*

Benzoic acid has the effect of preventing the accumulation of the urinary salts in the blood, and thus exercising a favorable influence over the course of the disease. Dr. Da Costa advises also warm bathing (and if patient is very weak a vapor bath may be given him in bed by means of hot bricks wrapped in wet towels) and an efficient purge.

For Sluggish Liver.

℞ Acidi nitro-muriat. dil.....℥ ii.
Succi (extract) taraxaci.....℥ ss.
Spiritus chloroformi.....℥ jss.
Aquæ.....ad. ℥ viij.

Sig.— ℥ j. three times daily. *Dr. Farquharson.*

Diarrhœa of Phthisis.

℞ Resin terebinth.....gr. iij.
Argenti nitrat.....
Opii.....aa gr. ¼

M. Sig.—One pill when needed.

This formula is used in these cases at Roosevelt Hospital with uniform good results, the diet being milk boiled with mutton suet until it is as thick as cream.

Squibb's Cholera Mixture.

Pepsini .....aa gr. 3

Mix. One dose, for children *Dr. Swezey.*

Pulvis Glycerrhizæ Co.

℞ Pulv. sennæ.....part 2
Pulv. glycyrrh. rad..... " 2
Pulv. foeniculi..... " 1
Sulphuris loti..... " 1
Pulv. sacchari..... " 6

Mix. Dose: 30 to 60 grains; an excellent and pleasant laxative.

Pulv. Bismuthi et Pepsini.

Infants' Hospital, Randall's Island, N. Y.

℞ Bismuthi sub-carb.....
Pepsini.....aa gr. 2

Mix. One dose for children.

Diarrhœa Powder.

Infants' Hospital, Randall's Island, N. Y.

℞ Bismuthi sub-carb.....gr. 2
Acid tannici.....gr. 1
Pulv. ipecac co.....gr. ¼

Mix. One dose, for children, in diarrhœa.

The following formula I have sometimes used to fulfil the two-fold indication of relieving nausea and restraining the bowels in the acute stages of gastro-enteritis.

℞ Bismuth. ammon. cit.....℥ ss.
Acid carbolic.....gtt. ij.
Liqr. atropiæ.....gtt. ij.
Tr. menthæ.....gtt. viij.
Tr. opii. deoderat.....gtt. x.
Syrup. acaciæ.....℥ ij.

Mix. Sig.—A teaspoonful every two or three hours.

When the more violent symptoms have abated I frequently prescribe the following to advantage:

℞ Bismuth sub. nitrat.....℥ i.
Lactopeptine.....℥ ss.
Pulv. cretæ co. c. opii.....ʒ ss.

M. Ft. chart No. x. Sig.—One three or four times daily.

When the evacuations are frequent, small, slimy or bloody, in other words, dysenteric, I find occasional use of a castor oil mixture to very great advantage, thus:

℞ Ol. ricini..... ʒ i.
Tr. opii. deoderat.....gtt. vi.
Syrup. acaciæ.....ℨ i.
Tr. menthæ.....gtt. ij.

Mix. Sig.—A teaspoonful every two hours till the stools assume a healthier character, after which the bismuth and lactopeptin powders may be resumed, with or without the comp. chalk and opium, as the condition of the bowels may indicate.

A. N. Talley, M.D., Columbia, S. C.

For Debility and Want of Appetite.

℞ Quiniæ sulph.....gr. viij.
Acid nit. dil..... ʒ ss.
Tinct. aurantii..... ℨ ss.
Syrupi aurantii..... ℨ j.
Aquæ.....ad. ℨ viij.

Dose: two tablespoonfuls three times a day.

Farquharson.

Diarrhœal Mixture.

℞ Tinct. catechu..... ʒ vj.
Pulver. cret. aromat..... ʒ ij.
Tinct. opii..... ʒ jj.
Mucilaginis..... ℨ j.
Aquæ cinnamonis.....ad. ℨ vj.

Take a tablespoonful after each liquid dejection.

Farquharson.

Good Purgative Formula.

℞ Hydrarg. subchlor.....gr. xij.
Mannæ.....gr. vj.
Pulv. tragacanthæ comp.....gr. vj.
M. Divide into six pills and take two as required.
Farquharson.

Chronic Gastric Catarrh.

℞ Argenti nitrat.....gr. xv.
Aq. destillat q. s. ad. solv.....
Ext. belladon.....gr. x.
Ol. carophylli.....gtt. x.
Rad. gent. pulv.....
Ext. gentianæ aa q. s. ut pill No. 60.....
Sig.—One three times a day. *Bartholow.*

Chronic Diarrhœa and Dysentery.

℞ Cupri sulphat.....gr. j.
Morphiæ sulphat.....gr. j.
Quiniæ sulphat.....gr. xxiv.
M. ft. pil. No. xij.
Sig.—One pill three times a day. *Bartholow.*

Dr. Bartholow says of the above prescription: "Of all the metallic astringents employed for this purpose, I know of none better or more effective than sulphate of copper. It is specially indicated where there are colic-pains, tenesmus, and the stools contain mucus streaked with blood."

In Gastric Ulcer.

℞ Bismuthi subnitrat..... 3 ij.
Morphiæ sulphat.....gr. j.
M. ft. pulv. No. vj.
Sig.—One three times a day in milk.

Bartholow.

M. Sig.—Tablespoonful three times a day.

Bartholow.

These formulæ will relieve the pain and vomiting of gastric ulcer, which is often so persistent.

Laxative.

℞ Magnes. sulph..... ℥ ij.
Ferri sulph.....gr. xxiv.
Acid. sulphur. dil..... 3 ij.
Infus. quassiæ..... ℥ viij.
Ft. mistura. Take a tablespoonful when going to bed.

Farquharson.

A Good Dinner Pill.

℞ Ferri sulph.....
Ext. nucis vomicæ.....aa gr. ss.
Ext. aloes barb.....gr. iij.
Ft. pil. To be taken before dinner.

Farquharson.

In Gastric Irritability.

℞ Bismuthi trisnitrat.....gr. x.
Pot, bicarb.....gr. v.
Mist. acaciæ..... ℥ j.
Inf. columbæ..... ℥ j.
M. Sig.—Three times a day before food.

Fothergill.

In tuberculosis, in illy-nourished patients where gastric irritability interferes with assimilation and digestion, the above mixture will quiet irritability and thus promote assimilation and improve nutrition.

For Flatulent Dyspepsia.

℞ Sodii bicarb.....
Sacchari.....aa ℥ ij.
Spiritus ammon. aromat.....m. xl.
Aquæ menth. piperit.....ad. ℥ viij.

The above formula is known as soda mint, and is a very pleasant antacid combination.

Dose.—A tablespoonful after meals.

Farquharson.

It admits of the addition of tinct. nux vomica or syrup of rhubarb.

Flatulent Colic.

℞ Tinct. nucis vomicæ..... ℥ j.
Acidi nitro muriatici dil..... ℥ ij.
Spiritus chloroformi..... ℥ j.
Infus. gentianæ.....ad. ℥ vj.

Dose.—Tablespoonful three times daily after meals.

Farquharson.

In Atonic Dyspepsia.

℞ Inf. columbæ..... ℥ iv.
Liq. potassæ..... 3 ss.
M. Sig.—A dessert to a tablespoonful three times a day before meals. *Bartholow.*

Anthelmintic.

℞ Olei terebinthinæ..... ℥ ss.
Olei ricini..... ℥ j.
Take in one dose. *Farquharson.*
The above prescription is very effective against round worms and also tæniæ.

For Irritative Dyspepsia.

℞ Acidi hydrocyanici dil.....m. xxv.
Bismuth subnitratis..... 3 ss.
Syr. aurantii..... ℥ j.
Gentian. infusi.....ad. ℥ viij.
Sig.—A teaspoonful three times a day before meals.
Dr. Farquharson.

In Flatulence.

℞ Acidi carbolici.....gr. j.
Pulv. rhei.....gr. iij.
Fiat pilula. (One every morning after breakfast.)
Dr. Habershon.

In Sarcina Ventriculi.

℞ Sodæ sulphitis.....gr. xxx—xl.
Inf. quassiæ..... ℥ iss.
Fiat haustus. To be taken three times a day.
Sir W. Jenner.

In Constipation.

℞ Sulphur. sublim..... ʒ ij.
Potass. acid tart..... ℥ ss.
Syr. limonis.....
Saccha. alb.....āā ℥ iij.
Fiat electuarium. A teaspoonful two or three times a day. *Niemeyer.*

In Nephritis (second stage).

℞ Tinct. ferri perchlor..... ʒ ij.
Sp. ætheris nit..... ʒ iv.
Inf. quass. ad..... ℥ vj.
Misce. A tablespoonful three times a day.
Dr. Grainger Stewart.

In Acute Nephritis.

℞ Inf. digitalis..... ℥ iss.
Sp. ether nit..... ʒ vj.
Syr. simplicis..... ℥ ss.
Aquæ, ad..... ℥ vj.
Misce. A tablespoonful three times a day.
Dr. Grainger Stewart.

A Strong Purge.

℞ Ol. crotonis..... ♏ iij.
Pulv. acaciæ.....gr. iij.
Tere simul, et adde.
Syr. simp..... ℥ ss.
Inf. anthemidis..... ℥ iij.
M. In one or two doses. *Trousseau and Reveil.*

In Chronic Diarrhœa and Dysentery.

℞ Cupri sulphat.....gr. ss.
Opii pulv.....gr. ss.
Conf. rosæ, q. s. ut fiat pil.....
Take three a day. *Dr. Joy.*

In Colic.

℞ Ol. crotonis.....♏ iij.
Ol. ricini..... ℥ ij.
One tablespoonful every two hours, with opium gr. ½ to 1 three times daily. *Niemeyer.*

In Chronic Gastric Ulcer.

℞ Creasoti.....♏ iv.
Aquæ..... ℥ vj.
Misce. In tablespoonful doses. *Niemeyer.*

In Acute Gastric Catarrh.

℞ Tannin.....ʒ ss.
Aquæ destil..... ℥ iij.
Misce. A teaspoonful every two hours where great purging but no vomiting. *Niemeyer.*

In Chronic Diarrhœa and Dysentery.

℞ Cupri sulphat.....gr. vj.
Myrrhæ.....gr. xij.
Conf. rosæ.....ʒ ij.
Fiat pil. xij. Sumat unam sextis horis.
Dr. Neligan.

In Dysentery.

℞ Catechu pulv..... ℥ ij.
Pulv. acaciæ..... ℥ ss.
Aquæ..... ℥ vj.
Misce. A tablespoonful every two hours.

Niemeyer.

In Acute Nephritis.

℞ Tinct. scillæ..... ℥ ij.
Tinct. digitalis..... ℥ iij.
Tinct. ferri perchlor..... ℥ ij.
Decoct. scoparii ad..... ℥ vj.
Misce. A tablespoonful three times a day.

Dr. Grainger Stewart.

In Chronic Gastric Catarrh.

℞ Bismuthi submit.....gr. x.
Argent. nit.....gr. i—ij.
Misce. To be given at once on an empty stomach before breakfast. *Niemeyer.*

III.

DISEASES OF THE NERVOUS SYSTEM.

Neuralgia.

℞ Aconitiæ.....gr. iv.
Veratriæ.....gr. xv.
Glycerinæ..... ʒ ij.
Cerati..... ʒ vj.

M. Sig.—To be rubbed over the parts; care should be taken to see that there is no abrasion of the skin.

Dr. Da Costa.

Among the many local applications in neuralgia, Prof. Da Costa has found this one the best adapted for general use.

Idiopathic Epilepsy.

℞ Potassii iodidi.....
Potassii bromidi.....aa ʒ j.
Ammon. bromidi..... ʒ ss.
Potassii bicarbonat..... ℈ ij.
Infus. columbæ..... ℥ vj.

Sig.—A teaspoonful before each of the three meals and three tablespoonfuls at bed-time, with a little water. *Brown-Sequard, M.D.*

When the patient's pulse is weak, substitute for the bicarbonate of potassium, in the above formula, the carbonate of ammonium, and for the six ounces of columbo an ounce and a half of the tincture of that medicine with four ounces and a half of distilled water.

Chorea.

℞ Zinci bromidi..... ℥ j.
Syr. simplicis..... ℥ j.

Sig.—Ten drops three times a day; increased as rapidly as the stomach can bear it.

Dr. William A. Hammond.

With the disappearance of the chronic symptoms the dose should be gradually diminished.

Neuralgia.

℞ Zinci valerianat..... ʒ j.
Ext. gentianæ..... ..... ʒ j.
Ext. nucis vomicæ.....gr. v.
M. Ft. pill. No. xx.
Sig.—One pill three or four times a day.

Dr. Bartholow.

In neuralgia due to reflex irritation from the female pelvic organs, this preparation of zinc is extremely beneficial.

As a Hypnotic.

℞ Chloral hydratis.....gr. xv.
Tinct. opii.....m. x.
Mist. camph..... ℥ j.
M. Sig.—Every six hours. *Fothergill.*

This is an admirable mixture to procure sleep for fever patients, without having it followed by the disagreeable effects so usual when opium is used in large doses to accomplish this purpose.

In Epilepsy in Weak and Anæmic Subjects.

℞ Potass. bromidi..... ℥ j.
Ferri bromidi.....gr. iv.
Aquæ..... ... ℥ ij.
Syr. simplicis..... ℥ vj.
M. Sig.—A tablespoonful twice a day.

Bartholow.

These cases are often dependent on cerebral anæmia alone, and are cured easily by using the above formula.

For Sub-Acute Mania and the Monomania of Suspicion.

℞ Hyoscyamiæ.....gr. j.
Sp. ætheris.....m. viij.
Alcohol.....m. xxiv.
Aquæ fontis.....ad. ℥ j.
M. Take at a draught. *Lawson.*

Dr. Robert Lawson, late of the West Riding Asylum, has recently made a large number of physiological and therapeutical observations on the actions and uses of the alkaloid of hyoscyamus. He has derived great benefit from the use of the above formula in recurrent, acute, and, sub-acute mania and the monomania of suspicion.

Cerebral Congestion.

℞ Sodii bromidi..... ℥ j.
Ergotæ extract. fl..... ℥ iv.
M. Sig.—A tablespoonful three times a day.

Dr. G. H. Naphey.

This formula is held by Dr. Naphey to be of great value in active cerebral congestion of all kinds, especially in the first or hyperæmic stage.

Reflex Headache.

℞ Potass. cyanid.....gr. x.—℈ j.
Aquæ lauro-cerasi..... ℥ iv.
Sig.—A compress moistened with the solution, to be applied to the seat of the pain.

Dr. Trosseau.

In reflex headache, whether gastric, cardiac, pulmonary, or menstrual, and the headache accompanying the pyretic state, from a quarter to a half hour contact with the skin of this solution usually effects a cure.

Anti-Epileptic Mixture.

℞ Sodii bromidi.....
Potass. bromidi.....
Ammon. bromidi.....aa ʒ ʒ
Potass. iodidi.....
Ammon. iodidi.....aa ʒ i½
Ammonii carbon..... ʒ i
Tinct. calumbæ.....fl. ℥ i½
Aquæ q. s. ad.....fl. ℥ 8
Mix. Full dose: one and a half-drachms before each meal, and three drachms at bedtime.

Dr. Brown-Séquard.

Hammond's Mixture.

℞ Quiniæ sulph.....
Ferri pyrophos.....aa 3 1
Strychniæ.....gr. 1
Acidi phos. dil. (tribas.).....fl. 3 2
Syrupi zingiberis.....fl. ℥ 2
Aquæ q. s. ad.....fl. ℥ 4
Mix. Dose: a teaspoonful.

Anti-Epileptic Pill.

Ninety-ninth Street Reception Hospital, New York.

℞ Argenti nitrat.....gr. 10
Zinci oxidi.....gr. 20
Micæ panis.....q. s.
Mix. Divide into twenty pills. Dose: one pill thrice daily.

Nervine Tonic.

℞ Zinci valerianatis.....gr. xxiv.
Confectionis rosæ.....q. s.
Ft. mass in pil. duodecim divid. Take as required.
Farquharson.

Delirium Mixture.

℞ Potass. bromid..... 3 4
Tinct. valerian. amm.....fl. ℥ 1
Tinct. lupuline.....
Tinct. digitalis.....aa fl. ℥ ½
Aquæ q. s. ad.....fl. ℥ 4
Mix. Dose: a tablespoonful. To be used with care and effects to be watched.

Chorea.

℞ Zinci valerianat.....ʒ ij.
Cinchoniæ sulphat.....ʒ j.
M. Ft. pil. No. xx. Sig.—One pill thrice daily.
Dr. Da Costa.

Cannabis Mixture.

Insane Asylum, Blackwell's Island, N. Y.

℞ Tinct. cannabis ind.....m. 10
Spiritus menthæ pip.....m. 1
Aquæ q. s. ad.....fl. ʒ 1
Mix. One dose. To be taken thrice daily after meals.

Tincture of Phosphorus.

Bellevue Hospital, New York.

℞ Phosphori.....gr. 32
Alcoholis absol.....fl. ℥ 46
Tinct. vanillæ.....fl. ℥ 1
Ol. aurantii cort.....fl. ʒ 3
Alcoholis absol. q. s. ad.....fl. ℥ 48
The phosphorus is digested with the absolute alcohol, with the exclusion of air, until dissolved; then the flavoring ingredients are added, and finally the bulk is made up with absolute alcohol to 48 fl.oz.
12 fl. drachms contain 1 grain of phosphorus.
30 minims contain $\frac{1}{24}$ grain of phosphorus.
Dose: 20-40 minims, corresponding to $\frac{1}{36}$-$\frac{1}{18}$ gr. of phosphorus.

Epileptic Belladonna Mixture.

Insane Asylum, Blackwell's Island, New York.

℞ Potass. bromidi.....gr. 25
Tinct. belladonnæ.....m. 5
Aquæ q. s. ad.....fl. ℥ i
Mix. One dose. To be taken thrice daily.

Phosphorus Mixture.

℞ Phosphori.....gr. i
Alcoholis absoluti.....fl. ʒ 5
Glycerinæ.....fl. ʒ 1½
Alcoholis.....fl. ℥ 2
Spts. menthæ pip.....fl. ℥ i

Dissolve the phosphorus in the absolute alcohol by the aid of a gentle heat; then add to it the glycerine, alcohol and spirits of peppermint, previously mixed and slightly warmed.

One fl.oz. contains $\frac{1}{20}$ gr. of phosphorus.

Dr. J. Ashburton Thompson.

Compound Syrup of the Hypophosphites.

℞ Calcii hypophosphitis.....gr. 256
Sodii hypophosphitis.....gr. 192
Potassii hypophosphitis.....gr. 128

Sig.— ℥ j. every four hours. *Dr. Farquharson.*

Epilepsy.

The following prescription is a useful one for a child about fourteen or fifteen years:

℞ Pot. bromid..... ℥ ss.
Ferri bromid.....gr. ij.
Glycerini ..... ℥ iv.
Aquæ.....ad. ℥ viij.

Mix. A tablespoonful twice a day. *E. Ellis.*

In Hysteria.

℞ Auro-sodii chloridi.....gr. v.
Pulv. tragacanth.....3 j.
Sacchar. alb.....q. s.
Misce, fiat pil. xl.

One pill an hour after dinner and supper. After, two pills following these meals, and gradually increase to eight pills daily. *Niemeyer.*

In Insomnia.

℞ Potass. bromid.....3 vj.
Aquæ destil.....℥ v.
Misce. Three teaspoonfuls before dinner, and four at bedtime, with a little wine and water.

Dr. Brown-Séquard

HEADACHE.

Treatment.—(1) *Of Sick-headache.*—Looking to the true cause of sick-headache as one which lies deep in the patient's idiosyncrasy, and as an affection which is developed by a hundred different sources of excitement, the advice to sufferers is to give as much tone as they can to their nerves by adopting all those methods which experience has shown to be good, and then avoid, as far as is practicable, all those causes which are known to excite an attack. Purgation has no good result. The only remedies which are of any avail are those which act on the nervous system, such as hot tea and coffee; or, after the stomach is quieter, and the more urgent symptoms have passed off, a little wine or ammonia. If the headache take more the form of hemicrania, then other remedies are occasionally useful, as the local application of the bisulphide of carbon, or galvanism, and internally the bromide of potassium. This is the only drug which Dr. Wilks has really seen to be serviceable. Whilst the nausea exists and the worst symptoms prevail, even this remedy is of no avail. As regards tea and coffee, which often relieve, it is possible that these and other stimulants, taken in excess, render the nervous system more susceptible to the attacks.

In the treatment of the paroxysm nothing is so ef-

ficacious as complete rest in the recumbent posture, with warmth, in a perfectly quiet and darkened room. A cup of very strong tea or coffee has also given relief. A comparatively new drug—guarana—has also been recommended. A full dose of brandy, or of ammonia, has also sometimes dispelled the headache; so has continued sipping of a solution of carbonate of potash or of soda. Pressure upon the carotid artery of the affected side sometimes also relieves the pain, but for a time only. Evaporating lotions, belladonna, or aconite ointment may also ward off or subdue the headache; but, as a rule, time is the most efficient element, with warmth to the feet and to the body, and the induction of sleep.

Adopting the theory of Dr. Latham, what are the indications for treatment with which it supplies us—(*a.*) During the stage of disturbed sensation; (*b.*) during the stage of headache; and (*c.*) during the intervals between the attacks? The following are the results of his experience:

(*a.*) *During the Stage of Disturbed Sensation.*—It is found that the longer this stage lasts, the greater will be the headache; and therefore it is desirable to shorten it as much as possible. If the condition depend upon deficient supply of blood to a part, such means must be adopted as shall assist and increase the flow of blood to the part; and this can be done in some measure by posture and stimulants. Directly the glimmering appears, the patient should lie down with the head as low as possible, and if the glimmering be on the right or left of the field of vision, he should lie on the opposite side. Let him take at once one

ounce of brandy, either "neat" or in half a bottle of soda-water. Champagne would be preferable, being more diffusible; but its administration would often involve a little delay. If alcoholic stimulants be objected to, or if it be not advisable to recommend them, then a teaspoonful of sal-volatile in water may be prescribed instead. If the patient be chilly or his feet cold, the couch should be drawn before the fire, a hot bottle applied to the feet, and his body covered over with a warm blanket or eider-down quilt. By these means the heart is enabled to drive the blood with greater force to the brain, and the duration of the vibratory movement is thereby materially lessened. After it has passed off, the patient should lie still for a time, so that the glimmering may not return. This injunction will only be necessary when the headache is slight; if it be severe, attended with much nausea or vomiting, the patient will be little disposed or able to leave the recumbent position. If, instead of the disturbance of vision preceding the headache, there be a feeling depression or irritability (fidgets), the administration of such cerebro-spinal stimulants as henbane, valerian, assafœtida, spirits of chloroform, or ether, will often cut short the attack; ten or fifteen drops of the tincture of henbane, with the same quantity of spirit of chloroform, will soothe the nervous irritability in the slighter forms, and may be repeated in three or four hours, if necessary. If there be great mental depression, then valerian or assafœtida should be tried. Stillé says,—"Nothing is more astonishing in the operation of remedies than the promptness and certainty with which a dose of valerian or assafœtida

dispels the gloomy visions of the hypochondriac, calms the hurry and agitation of nervous excitement, allays commencing spasms, and diffuses a soothing calm over the whole being of one who but an hour before was a prey to a thousand morbid sensations and thick-coming fancies of danger, wrong, or loss." Dr. Latham gives the preference to valerian, and prescribes from half a drachm to a drachm of the ammoniated tincture. Or it may be combined, as in the following formula, with bromide of soda; ammoniated tincture of valerian ℥ iv. with ʒ vi. bromide of sodium, in teaspoonful doses every hour. The assafœtida may be given in the form of the spiritus ammoniæ fœtidus of the Pharmacopœia, also in half drachm or drachm doses. As a rule, alcoholic stimulants are not advisable in this stage of the headache. A small quantity will cause flushing, heaviness, slight confusion of thought, etc., without relieving the depression; and though the severe headache may be averted, alcoholic stimulants do not answer so well as the remedies previously mentioned.

(*b.*) *During the Stage of Headache.*—If the headache be slight and the patient soon able to sit up, there is little to be done; a cup of coffee or tea, cheerful conversation, a walk, drive, or ride, may often help to remove the pain. If, however, the headache, and nausea be severe, then the administration of further remedies is called for. The patient should keep perfectly still and quiet, with the room darkened; for every sound or sight causes pain, and the slightest movement is sufficient to produce gastric uneasiness. Sometimes free evacuation of the contents of the stomach, espe-

cially if it contain undigested food, is followed by relief. Dr. Fothergill says,—"An emetic and some warm water soon wash off the offending matter, and remove these disorders," which may be very well where there is any offending matter to wash off, but it is not very often that this is the case; the nausea frequently continues long after the contents of the stomach have been discharged; an inverted action of the duodenum is set up; the bile appears in the fluids excreted; the patient believes that all his troubles are due to "its overflow;" "it's all liver," he says, and it is sometimes difficult to persuade him to the contrary. Generally, then, you should try to relieve and check the vomiting. Iced soda-water, with or without two or three drops of dilute hydrocyanic acid, or spirit of chloroform; cold tea; the effervescing citrate of potash, with hydrocyanic acid, may often afford marked relief. The headache may be lessened by applying cloths dipped in cold water, or evaporating lotions, to the head; if the extremities be cold and the headache severe, a warm stimulating foot-bath can be tried so soon as the nausea will allow the patient to sit up. If the attacks occur in the early part of the day, as soon as the pain has subsided it is generally better for the patient to sit up, or move about, or take exercise in the open air. During the attack the appetite is diminished, the idea even of food provoking disgust. Still, after the nausea has passed away and the headache has continued a few hours, a plate of hot soup or some easily digested food will often have a good effect in equalizing the cerebral circulation. A remedy which may very often be given with advan-

tage if the headache be severe, is bromide of potassium, in doses of five, ten, or fifteen grains, to which thirty or forty minims of sal-volatile may, in some cases, be added with advantage; and if the nausea still continue, these may be given in combination with the effervescing citrate of potash. A saline purgative at the commencement of an attack is sometimes an effectual remedy; but, as a rule, the use of purgatives is objectionable. So far, these measures are only palliative.

(*c.*) *During the Intervals between the Attacks.*—First of all, the exciting cause is to be discovered and removed. Hours of study or work must be abridged; excessive bodily fatigue, loss of rest, everything, in fact, must be avoided which the sufferers know from individual experience will act as exciting causes. Where the attacks are associated with excessive mental work, they should be regarded as danger-signals, showing necessity for relaxation. The tone of the bodily and nervous systems must be improved by proper medicinal and hygienic means; and the chief remedies are steel, strychnine, phosphorus, and cod-liver oil. The success, however, following these remedies depends a great deal upon the way in which they are administered. For a day or two after the attack the stomach and bowels may possibly be disordered, and not in a fit state to tolerate such remedies. This must first be corrected. The simple vegetable bitters, such as gentian, with small doses of henbane and some aromatic, may be of service; and, if necessary, one or two grains of blue pill, with four or five of compound rhubarb pill, may be given at night. We may

then try steel. In anæmic cases it may be advisable to stimulate the action of the heart, as by the following:

℞. Ammoniæ muriatis, ℥ ss., Tinct. acteæ racemosæ, aquæ, a a ℥ iii. Two fluid drachms for a dose after meals in a wineglass of water.

If there be despondency with depression of spirits, phosphorus to the extent of $\frac{1}{100}$ to $\frac{1}{50}$ of a grain, combined with nux vomica or carbonate of iron, or both taken with each meal, will improve the tone of the patient. If the attacks have been frequent, or if there be any scrofulous tendency, the iodide of iron may be given in the following form:

℞. Ferri et ammon. citrat., gr. v.; potassii iodidi, gr. ij.; aquæ, ℥ j.; and, according to circumstances, fifteen to twenty minims of tincture of henbane or twenty or thirty minims of aromatic spirit of ammonia may be added.

If the stomach be at all irritable, this medicine may be given in the effervescing form, adding to each dose twenty grains of bicarbonate of potash, and directing it to be taken with a tablespoonful of lemon-juice, or a corresponding amount of citric acid: the dose to be taken twice a day, about eleven and four. The effervescing form may soon be left off, and then to each dose may be added five minims of liquor of strychniæ (omitting the henbane and sal-volatile, and continuing the iodide of potassium according as it seems to be indicated or not). In other cases, the citrate of iron and ammonia with strychnine may be given at the beginning, sometimes combined with infusion of calumba. The iron is indicated by the

greater or less anæmia of the patient; but the strychnine is a very important remedial agent in the disorder. In small doses it acts as a simple tonic, increasing the appetite and improving the digestion; it dilates the vessels and, thus increasing the supply of blood, it augments the activity of the spinal cord (Harley). It promotes the capillary circulation, and therefore its use is advisable for persons troubled with cold hands and feet (Anstie); and if it fulfil these conditions, it is clearly indicated in this disorder. Cod-liver oil also often acts very beneficially. "It has been found by experiment that great exertion and prolonged labor can be endured without fatigue when starchy and fatty foods are alone eaten; . . . . and there is reason to think that cod-liver oil is more easily absorbed than other similar substances" (Ringer). "It improves the digestive process, increases the proportion of red corpuscles in the blood, and invigorates the whole nutritive function" (Wood); and it particularly sustains the energy of the brain during prolonged mental exertion. A gentleman in the foremost rank at the bar told Dr. Latham that whenever he was engaged in a jury-trial which was likely to tax his energies to a greater degree than usual, the thing which best sustained him was a good dose of cod-liver oil taken in the morning before going into court; and others engaged in mental work have confirmed this view. Besides its other properties cod-liver oil is a nutrient and tonic in its action on the cerebro-spinal nervous system. As a remedy for these nervous headaches, Dr. Latham prescribes it once a day, beginning with a small teaspoonful imme-

diately after breakfast, and gradually increasing the quantity to a tablespoonful, but not beyond, unless in exceptional cases.

The action of the bowels must be regulated, but not by strong purgatives. Five grains of the Socotrine aloes pill, given at night, are generally sufficient. If the bowels be habitually constipated, then no remedy seems to answer so well as the aloes and iron pill. Five grains given twice a day, half an hour before meals, will act freely; and in a few days the dose will have to be diminished, for its effect is augmented instead of being lessened by continual administration, especially when strychnine is given at the same time. The natural waters of Friedrichshall or Marienbad may, in many instances, be of service, given as laxatives.

In 1872 Dr. Samuel Wilks, Physician to Guy's Hospital, directed the attention of the profession to guarana as a remedy for sick-headache, and at the same time asked for the experience of those who already had some acquaintance with the drug. His own knowledge of it dated about 1870, when, after the appearance of a lecture of his upon sick-headache, he received a letter from Mr. Helmcken, of British Columbia, in closing two powders, which he recommended with much confidence as able to cure the complaint. "Upon my first headache after the receipt of Mr. Helmcken's letter, I took the powder, but with only doubtful effect. I therefore did no more than casually mention the medicine to my friends, but did not recommend it. A few weeks ago, after the appearance of a second communication of mine in the jour-

nal upon the same complaint, I received a letter from Dr. Wood, of Montreal, in which he also recommended guarana as a remedy for headache, and gave a history of his own personal sufferings and the relief which he obtained. He says, 'By taking one of these powders and remaining quiet when I have felt premonitory symptoms by a beginning of pain always in the right temple (headache on the other side, or in any other part of the head, I never mind), I have carried off the attack; and, with the first box, absolutely put it off for two months—something which had never occurred in my life before.' Upon so good authority, I determined to try the remedy in a more systematic manner, and requested my neighbor, Mr. Hooper, the chemist, to procure me a packet of the powders. These I have recommended to several patients and friends; and the result is so encouraging, that I have hastened to suggest their trial to my professional brethren. One lady speaks most enthusiastically of their power, as she has now, on two separate occasions, had her headache arrested by their use. The drug has long been known, for mention is made of it in English and French pharmacologies, but appears never to have come into general use. It consists of the seeds of a tree growing in Brazil, called Paullinia sorbilis; and these, according to Johnstone, in his "Chemistry of Common Life," are used as we do cocoa. The seeds are ground into powder, and contain an alkaloid which is said to be identical with that found in tea and coffee. The medicine is manufactured by Grimault & Co., No. 7 Rue de la Feuillade, Paris" (Wilks, *Brit. Med. Journ.*, April 20, 1872).

The general outcome of experience regarding the treatment of sick-headache seems to be that—

(1.) Bromide of potassium, Indian hemp, Guarana or Paullinia powder, are remedies which have afforded relief. With reference to bromide of potassium, it is so valuable a medicine in many cases of sick-headache that it can scarcely be superseded by a better remedy. The patient may have a splitting headache, fatigued and worried after a hard day's work. After fifteen or twenty grains of bromide of potassium, he presently goes off to sleep in his easy chair, and wakes in an hour well (Wilks). It is a medicine which Dr. Wilks always employs first, having seen such eminent advantages follow its use. "I have known (he writes) many patients declare, that the bromide was the first medicine they had taken in their lives which had the slightest effect in relieving their headache." As to Cannabis Indica, it seems best adapted to the interval between the attacks, in doses of a few drops of the tincture, when headaches are recurrent. It is best given in ten-minim doses, three times a day, continued for weeks or months (Wilks, John Murray). As to guarana powder, it seems most of all useful with females in arresting headache, so that it must be taken early when the headache is approaching; and if headache is not arrested, a second dose should be taken in fifteen, twenty, or thirty minutes after the first. If the medicine is of use, the headache will have gone in about an hour. The dose is 15 grains of the powder; and as it is somewhat astringent, it might be combined as an electuary with some laxative, such as the senna electuary (Hollis).

(2.) Certain classes of cases ought to be distinguished from each other. There are two principal types: the congestive, met with in dark or plethoric people, in those with constipated bowels and suppressed secretions, and those addicted to alcoholic beverages, or leading a monotonous sedentary life; and that arising from exhaustion, whether from want of sleep or want of food, or great bodily or mental fatigue, strong emotions, etc.,—this may be nervous, or asthenic, or anæmic in many cases. This latter form is very common in slight, delicate, and tuberculous females, and sometimes in the male sex. The treatment of these two forms must, of course, differ widely. An emetic or a purge in the one case will do what only rest, food, stimulants, and such medicines as quinine, iron, opium, hyoscyamus and belladonna may afford in the other case (Dr. Bathurst Woodman). Rest and quiet, especially sleep, and abstinence from food, give relief and cure by a natural process of restoration. Generally, no relief is obtained till after a night of sound sleep—*i. e.*, "one night through the sheets"—awakening next morning free from pain, but generally more or less depressed. If depression continue, phosphorus with nux vomica in the form of sugar-coated or pearl-coated pills may be given to the extent of one fiftieth of a grain of phosphorus and one eighth of a grain of extract of nux vomica three times a day with food. Such despondency and depression are apt to occur in those who are over-worked mentally; or who are harassed by business; or who suffer great mental anxiety. If there be sleeplessness, the following pill may be of use:

℞ Camphoræ pulveris, gr. xx.; Ext. Cannabis Indica, gr. xii.; Ext. Hyoscyam., gr. xxiv.; misce bene. Divide in pill xii. signa, one at night, to be repeated in two hours, if necessary, to procure sleep.

As to local application, a large sinapism over the stomach, followed by a warm linseed meal poultice, has sometimes been of service. If pressure relieves, the head may be bound round with a handkerchief. When the head throbs and is hot, instinct seems to suggest cold and pressure to the part; and one of the best external appliances on which we can rely to procure relief is the wet bandage tied tightly round the head. The method must be instinctive, for it is universal, and has been used from all time. Shakespeare is often quoted to illustrate the morbid states of the body as well as the passions of the mind, and he also testifies to this ancient practice. For example, in the scene between Hubert and Arthur in "King John," the latter, when petitioning for the preservation of his eyes, says:

> "When your head did but ache
> I knit my handkerchief about your brows."

And in Othello we have not only the remedy for headache given, but the cause. The former was the handkerchief about which the chief interest of the play centred.

> "*Desdemona,* Why do you speak so faintly?
> Are you not well?
> *Othello,* I have a pain upon my forehead here.
> *Desdemona,* Faith, that's with watching: 'twill away again.
> Let me but bind it hard, within this hour
> It will be well."

Sick-headache is not to be cured by gastro-hepatic remedies. It is a purely nervous affection, due to hereditary predisposition, and excited by causes innumerable which act on a susceptible nervous system. There is, then, no cure in the proper sense of the term, for this would imply a change in the patient's nature; and for the attacks themselves, when severe, the only relief which can be reckoned upon is to be found in a wet bandage round the head, profound quiet, and, if possible, sleep (Dr. Bathurst Woodman).

Considerable relief may be obtained from the use of cold applications, in the form of wet rags, ice in a bladder, or a little of the ether-spray; but in not a few cases, after all, the best treatment during the attack is absolute rest and quiet, in a dark room, with warmth to feet and body, total abstinence, except perhaps from fluids (hot and alkaline) in small quantities at a time; to go to bed at once, and refrain from the use of any remedies.

In a lecture on the therapeutics of headache, delivered at Bellevue Hospital Medical College, Dr. A. A. Smith suggests certain combinations of remedies which he has found of service in certain forms of headache: (1.) Malarial headache, where the pain is most frequently located in the sub-occipital or frontal regions, or on either side,—hemicrania. If distinctly periodical, give ten or fifteen grains of quinine two or three hours before the expected attack. It may be necessary to push the quinine in divided doses until cinchonism is produced, and kept up for several days. Then gradually diminish the dose. If the pain still continues to recur, resort to arsenic and belladonna,

five-drop doses each of Fowler's solution and belladonna tincture, after meals, increasing the Fowler's one drop each day, until œdema arsenicalis is produced. This will seldom fail to give relief.

(2.) In Headache dependent on Gout:

℞ Vini colchici seminum, ʒ iij.; Lithii bromidi, ℥ ss.; Syr. zingiberis, ℥ ss.; Aq. cinnamonii, q. s. ad. ℥ vj.; M. Sig. ℥ ss. in a tumbler of Vichy water every four hours.

(3.) Rheumatic Headache is characterized usually by tenderness of the scalp, which is increased on pressure or motion. Use the mild Faradic current on the scalp, and internally the following:

℞ Potassii iodidi; Ammoniæ muriatis, aa ʒ jss.; Infusi humuli, ℥ vj.; M. Sig. ℥ ss. four times a day in a wineglass of water.

In cases which have not yielded to the above treatment, bromide of ammonium in twenty-grain doses every two hours may be effectual.

(4.) Uræmic headache is of great importance as a symptom of serious disease. The pain in the head may be the first evidence that there exists renal disease, and that we have to deal with uræmic headache. The judicious plan of treatment in such cases is to call into action one or all of the three great emunctories of the body, the kidneys, the intestines, and the skin. To make the kidneys act, apply dry cups over the region of them, and give internally the following:

℞ Potassæ acetatis, ʒ vj.; Infusi digitalis, ℥ vj.; M. Sig. ℥ ss. every third hour.

The infusion should be made from fresh English

leaves. Give this until the kidneys act freely, if you can make them do it within twenty-four hours. If the kidneys do not act freely, and the headache be not relieved within twenty-four hours, give a saline cathartic. A treatment almost domestic, and often very effectual, is to put an ounce of cream of tartar in a quart of water, and have the patient drink this in eight or ten hours. It acts both as a diuretic and cathartic. Do not use hydrogogue cathartics unless convulsions be threatened. Some prefer elimination by the skin. This can be done by diaphoretics and the hot, moist, or dry air baths. Diuretics, cathartics, and diaphoretics are only to be used where there is deficient quantity of urinary secretion. There are other causes of headache in Bright's disease which occur independently of the presence of an abnormal amount of urea in the blood, and which yet are dependent on the results of the kidney disease. These causes may be anæmia, neuralgia, œdema of the brain itself, serous effusion into the ventricles; and, in acute Bright's disease, cerebral congestion. Under the last condition, if the headache be very severe and convulsions threaten, blood may be taken if the patient's condition will admit of it, from twelve to twenty ounces, if necessary to relieve distressing symptoms. The best way to take it is by means of wet cups over the region of the kidneys. If the headache be dependent on serous effusion into the ventricles, or on cerebral œdema, improve the vitiated condition of the blood, and stimulate the heart and kidneys by acetate of potash and infusion of digitalis. There is apt to be general anasarca with this effusion and œdema.

(5.) The Headache of Acute Alcoholism, or inebriety. The first indication is to remove the alcohol from the intestinal canal. For this, give of rhubarb and magnesia calcined each a half drachm, and then the following:

℞ Spiritus ammoniæ aromat., ʒ ij.; Tincture camph., ʒ jss.; Tincture hyoscyami, ʒ ijss.; Spiritus lavandulæ comp., q. s. ad ℥ ij.; M. Sig. ʒ j. every hour until the headache is relieved, and then give capsicum gr. ij. and quinine gr. iij. before each meal for several days. If there be sleeplessness give ℞ Sodii bromidi, ℥ ss.; Chloral. hydrat., ʒ ijss.; Syrupi aurantii cort., ℥ ss.; Aquæ, ℥ iijss. M. Sig. ℥ ss. at night; repeat in two hours if necessary to produce sleep.

(6.) *Dyspeptic Headache.*—If there be indigestible food in the stomach, and it have been there some time, give an emetic, as mustard and warm water, or sulphate of zinc, gr. xv. If there is evidence of indigestible food in the alimentary canal beyond the stomach, give gr. xx. of rhubarb and magnesia each, to remove it from the bowels. If the headache be frontal, and the pain be located immediately over the eyes, give dilute nitro-muriatic acid in ten-drop doses, well diluted after meals. If the pain be located about the roots of the hair, give an alkali before meals, as gr. xv. of bicarbonate of soda or magnesia. The dyspeptic headache oftentimes is not confined to these regions, but spreads over the entire head. In such cases combine an acid with an alkali, and add to these nux vomica, as in the following prescription:

℞. Sodæ bicarbonatis, ʒ ijss.; Acidi nitro-mur. di-

luti., ʒ ij.; Tinct. nucis vomicæ, ʒ jss.; Syr. aurant. cort., ʒ vj.; Aquæ, q. s. ad ℥ vj. M. Sig. ℥ ss. after meals in a wineglass of water.

If there be gastric pain, a mild counter-irritant, as a mustard plaster to the epigastrium, will often relieve the pain in the head as well as the pain in the stomach. If flatulence be a troublesome symptom, give the following:

℞. Bismuthi subcarbonatis, ʒ ijss.; Tinct. nucis vomicæ, ʒ jss.; Tinct. cardamomi comp.; Spiritus lavandulæ comp. aa q. s. ad ʒ iv. M. Sig. ʒ ij. before meals in a wineglass of water.

If there be constipation, the following pill may be given, in the morning:

℞. Aloes pulv., ʒ ss.; Ext. nucis vomicæ, gr. v.; Ext. belladonnæ, gr. iv.; M. Div. in pilul. xv.

In some forms of headache associated with stomach indigestion, small doses, often repeated, of tincture of nux vomica may be effectual. A single drop every fifteen minutes and continue this two or three hours if necessary. In other cases, where the headache comes on soon after a meal, and seems to depend on delayed stomach digestion, large doses of pepsin are effectual. Give a half drachm of saccharated pepsin in a wineglass of sherry wine, three times a day, and let it be taken during meals.

(7.) *Congestive Headache.*—Cerebral congestion as a cause of headache may be divided into two varieties, active and passive. These demand almost directly opposite plans of treatment. In the active variety the patient should be kept in a darkened room, perfectly quiet, and have cold and evaporating lotions applied

to the head. A saline cathartic may be given; and the following prescription:

℞. Sodii bromidi, ʒ ijss.; Fl. ext. ergot., ʒ ijss.; Syr. zingib., ℥ ss.; Aq. aurant. flor. q. s. ad ℥ iv. M. Sig. ℥ ss. every two hours.

If the skin be hot and dry, and the pulse full and rapid, give two drops of Fleming's tincture of aconite root every two hours, until the heart's action is sensibly diminished. Sometimes also a hot mustard foot-bath will give relief. The passive congestive variety demands a different mode of treatment. It is often found associated with cardiac disease, and most frequently where there is predominant dilatation. Hypertrophy gives rise to the active variety. Improve the condition of the blood by the use of iron, quinine, bitter tonics, alcoholic stimulants, good food, and stimulate the heart's action by the use of the following:

℞. Tinct. digitalis, ʒ iij.; Spirit. amm. aromat., ʒ vj.; Spirit. lavandulæ comp.; Syr. simp. a a q. s. ad ℥ iij. M. Sig. ʒ j. every four hours.

(8.) *Anæmic Headache.*—Cerebral anæmia produces a headache which is often mistaken for the passive cerebral congestive form. It is associated with general anæmia, nervous exhaustion, and may occur in heart disease, in consequence of enfeebled heart power, such as is met with in enlargement with dilatation, fatty degeneration, and myocarditis. Improve the general condition of the patient, and stimulate the heart's action as recommended in the passive cerebral congestive variety. Nitrite of amyl will relieve the immediate headache. Let the patient inhale three to five drops of it on a piece of cotton, placed within one

nostril, while the other is held closed. When associated with nervous exhaustion, employ the following remedies:

℞. Strych. sulph. gr., ss.; Tinct. ferri chloridi, ʒ ij.; Glycerinæ ℥ ss.; Infusi gentian., q. s. ad ℥ vj. M. Sig. ℥ ss. after meals, in a wineglass of water.

Alcoholic stimulants are beneficial in headache dependent on cerebral anæmia. Champagne as a remedy, and not as a beverage, may be given to those who suffer from nervous exhaustion; or a tablespoonful of brandy, diluted with water, after each meal.

(9.) *Cerebral Tumors* give rise to headache, often severe. In all such cases, give iodide of potassium; for it cannot be safely said that in any given case the tumor does not depend on syphilis, and by administering the remedy the patient gets the benefit of the doubt.

There is reason to believe, too, that patients with cerebral tumors, dependent on other and unknown causes, are benefited by the use of iodide of potassium. If there be much sleeplessness, use the bromide and chloral mixture. Ergot has also been used. It is usually given in large doses, beginning with ʒ i. of the fluid extract three times a day, and gradually increasing the dose to half an ounce. *W. Aitken.*

IV.

DISEASES OF WOMEN.

Sleeplessness in Uterine Disorders.

When patients complain of nervousness or of sleeplessness, the potassic bromide must be given, either alone or in combination with other remedies. A cheap mixture, much thought of by our patients at the University clinic, is the following:

℞ Pulv. ferri sulphat. exsiccat.....gr. xxx.
Potassi bromidi.....
Rad. calumbæ contus..... } aa ℥ j.
Aquæ bullientis.....Oj.

Steep for twenty-four hours and then strain.

Sig.—One tablespoonful in a wineglassful of water just before or after each meal.

I cannot say much for the palatableness of this infusion nor more for its pharmaceutical elegance; but it does good, and we therefore give it largely to our poor patients. The iron and the potash in it may be increased or lessened, or the former may be left out, as the case may be. The zinc valerianate given thrice daily in doses of from two to four grains is one of our best nervines. For a better class of patients the fol-

lowing antispasmodic mixture can be prescribed with very general satisfaction:

℞ Elixir humuli.....fl. ℥ j.
Elixir ammoniæ valerianat.....
Syrupi lactucarii..... } aa fl. ℥ ss.

M. Sig.—One dessertspoonful at bedtime, or during the day when needful. *Wm. Goodell, M.D.*

In Rheumatic Dysmenorrhœa.

℞ Am. hydrochlor,..... ℥ iij.
Tinct. stramonii..... ℥ ss.
Tinct. cimicifugæ rac..... ℥ jss.
Syr. glycyrrhizæ..... ʒ ij.

M. Sig.—Teaspoonful three times a day.
Dr. N. S. Davis.

OR

℞ Acidi salicylici..... ʒ iij.
Sodii bicarbonatis..... ʒ ij.
Tinct. stramonii.....
Vini colchici radicis.....aa ʒ iv.
Glycerinæ..... ℥ j.
Aquæ..... ℥ iij.

M. Sig.—A teaspoonful four times a day in water.
Dr. N. S. Davis.

When the pain and soreness extends to the ovaries, Professor Davis has succeeded with these formulæ in a large number of cases. He also recommends that patients place themselves in the knee and chest position three or four times a day for a few minutes, thus throwing the uterus, by force of gravity, into its natural position.

Chronic Cervical Endometritis.

℞ Magnesiæ sulphatis..... ℥ ij.
Ferri sulphatis.....gr. xvj.
Acid. sulph. dil..... ʒ j.
Aquæ .....Oj.
M. Sig.—Two tablespoonfuls in a tumbler of iced water daily on rising. *Dr. T. G. Thomas.*

OR

℞ Sodii et potass. tart..... ℥ ij.
Vini ferri amari..... ℥ ii.
Acid. tartarici..... ʒ iij.
Aquæ ..... ℥ xiv.
M. Sig.—Two tablespoonfuls as above.
Dr. T. G. Thomas.

Prof. Thomas advises the use of the above prescriptions as tonic and cathartic, relying mainly in these cases on the observance of good hygiene.

Congestive Dysmenorrhœa.

℞ Ext. ergotæ fl..... ʒ vii.
Tinct. gelsem. co..... ʒ j.
Tinct. aconit. rad.....gtts. xvi.
M. Sig.—A teaspoonful every two, three or four hours. *Bartholow.*

Vomiting of Pregnancy.

℞ Cerii oxalatis.....gr. xxiv.
Ext. hyoscyami.....gr. xxxvi.
M. Et. ft. pil. No. xii. Take one twice a day.

A Remedy for the Sick Stomach of Pregnancy.

Dr. Forwood, at a late meeting of the Lancaster, Pa., Medical Society, read an interesting paper on the "Treatment of the Sick-stomach of Pregnancy." His favorite prescription is as follows:

℞ Rad. columbo .....
Rad. zingiber.....aa ℥ ss.
Fol. sennæ..... ℥ j.
Aquæ bullient.....Oj.
Mix. Infus.
Sig.—A wineglassful before each meal.

Vomiting of Pregnancy.

℞ Cupri sulphat.....gr. ij.
Aquæ distillat..... ℥ ss.
M. Sig.—Six drops at a dose. *Bartholow.*

In Chronic Cervicitis and Leucorrhœa.

℞ Iodoformi..... ℥ j.
Acid. tannici..... ℥ j.
M. Sig.—A sufficient quantity to be packed in a dry state around the cervix. *Bartholow.*

In Anæmia with Amenorrhœa.

℞ Arsenic.....gr. j.
Ferri. sulph. exsiccat..... ℥ ss.
Pulv. pip. nig..... ℥ j.
Pil. al. et myrrh..... ℥ j.
M. Div. in. pil. xl.
Sig.—One twice a day after meals.

Fothergill.

This excellent combination, by its tonic effect on the blood and its determinative effect on the menstrual function, will speedily restore the patient to her normal condition.

The Vomiting of Pregnancy.

℞ Cerii oxalat.....gr. j.
Ipecacuanhæ.....gr. j.
Creasoti.....gtt. ij.
Sig.—To be taken every hour. *Dr. Goodell.*

This prescription has been used with uniform success in this annoying and sometimes dangerous complication of pregnancy, at the Episcopal Hospital, Philadelphia.

Milk Fever.

℞ Tinct. aconit. rad.....,.....gtt. xx.
Antimon. et potass. tart.....gr. ij.
Spt. etheris nitrici.....
Syrupi simplicis.....aa ℥ j.
Aquæ aurantii flor..... ℥ ij.
Sig.—A teaspoonful in a wineglassful of sugar and water every two hours. *Dr. Fordyce Barker.*

In addition to this, Dr. Barker gives nutritious, easily digested food; applies the child to the breast as soon as the patient has recovered from the exhaustion of labor; attends to the state of the bowels; gives a diaphoretic anodyne, and has the nurse rub the breasts from circumference to nipple with warm sweet oil every three hours.

In Rheumatic Dysmenorrhœa.

℞ Tinct. cimicifugæ..... ℥ iij.
Tinct. stramonii..... ℥ ss.
Vin. colchici rad..... ℥ ss.
M. Sig.—A teaspoonful at each mealtime in water.
N. S. Davis, M.D.

If the cimicifuga or colchicum causes headache and disturbance of the bowels, lessen the quantity relatively to the other constituents of the prescription. The above is recommended by Prof. Davis in that common class of cases, where pain is severe and the flow scanty.

Laxatives for Habitual Use in Uterine Disorders.

℞ Ext. colcynth. comp.....gr. ij.
Ext. belladonnæ.....gr. ½.
Ext. gentianæ.....gr. j.
Ol. carui.....gtt. ss.
Et ft. pil. No. j.
M. To be taken at bedtime.

The pulvis glycyrrhizæ comp. of the Prussian Pharmacopœia is another good laxative. I have kept patients upon it for months, and always with benefit. The formula for it is as follows:

℞ Pulv. glycyrrh. rad.....
Pulv. sennæ..... } aa ℥ ss.
Sulphuris sublim.....
Pulv. fœniculi..... } aa ʒ ij.
Sacchar. purif..... ℥ jss.
M. Sig.—One teaspoonful in half a cupful of water at bedtime. *Wm. Goodell, M.D.*, Phila.

Metrorrhagia.

℞ Liquor ferri sulphatis..... ℥ ss.
Aquæ..... ℥ j.

M. Sig.—Saturate with this solution the finest cotton wool; dry and expose to moderate pressure. Wrap a sufficient quantity around a long small piece of whalebone and introducing it into the cavity of the uterus, withdraw the whalebone, leaving the cotton *in situ*. Strong thread may be attached to the cotton to withdraw it when necessary. From 12 to 24 hours is as long as it should remain.

This hemostatic is that proposed and used by the distinguished gynæcologist, Dr. J. Marion Sims, which is proof positive of its efficiency.

In Accidental Hemorrhage During Pregnancy.

℞ Acidi sulphurici dil..... 3 j.
Tinct. opii.....m. xl.
Infus. rosæ. co..... ℥ vj.

Sig.—Two teaspoonfuls every hour.

OR

℞ Plumbi acetatis.....gr. xviij.
Acidi acetici.....m. xx.
Morphiæ acetatis.....gr. j.
Aquæ destillatæ..... ℥ vj.

J. G. Swane, M.D.

Coming from the accoucheur to the Bristol General Hospital, England, these formulæ so uniformly successful may be highly commended. Posture should be attended to and cold compresses applied to the vulva.

Barker's Post Partum Pills.

℞ Ext. colocynth. co.....
Hydr. chloridi mitis.....aa 3 xiij.
Ext. hyoscyami.....gr. xl.
Ext. nucis vom .....
Pulv. aloes.....
Pulv. ipecac.....aa gr. xx.
Mix. Divide into 120 pills. *Dr. Fordyce Barker.*

For the Anæmia of Chlorosis.

℞ Ferri vini amari..... ℥ vijss.
Tinct. nucis vomicæ..... 3 iv.
Liq. potassæ arsenit..... 3 ij.
M. Sig.—A dessertspoonful in a glassful of water just after each meal.

Prof. T. Gaillard Thomas, M.D.

In addition to this Dr. Thomas (regarding the indications to remove the cause, cure the neurosis, and repair the damage) advises general tonic treatment and the observance of good hygiene.

In Menorrhagia of Climacteric Period.

℞ Ext. ergotæ aq. (Squibb)..... ℈ ij.
Butyri cocoæ..... 3 j.
M. Make twelve suppositories and introduce one into the rectum morning, noon, and night, carrying them well up into the bowel and having the patient lie down for an hour afterward.

Prof. Fordyce Barker, M.D.

The Doctor advises the uses of these suppositories for a week previous to the return of the expected period.

Ergot and Aloes for Amenorrhœa from Atony of the Uterus.

℞ Tr. ergot..... 3 ij.
Decoct. aloes comp.....ad ℥ viij.
M. Two tablespoonfuls twice a day.

Metrorrhagia of Climacteric Period.

℞ Iodoformi..... 3 ijss.
Gum tragacanthæ.....gr. xv.
Mucilaginis.....q. s.
M. Sig.—Divide into ten cylinders, each one and one half inches in length, and for the five or six days preceding menstruation introduce one of these cylinders into the cavity of the uterus and keep it in place by a pledget of cotton pushed against the cervix.

Prof. Fordyce Barker, M.D.

This plan Dr. Barker has found to effect a cure if carried out for two menstrual periods.

In Chlorosis.

℞ Ferri arseniat.....gr. ij.
Ext. cinchonæ.....gr. xij.
M. Ft. pil. No. xij.
Sig.—One three times a day after meals.

Dr. Bartholow.

Metrorrhagia.

℞ Hydrarg. chlorid coros.....gr. $\frac{1}{12}$
Tinct. cinchonæ comp..... 3 j.
Sig.—This amount thrice daily.

Dr. Wm. H. Byford.

The above should be given in the intermenstrual period while mechanical means are resorted to at the time of menstruation. Of course quiet and the best possible hygienic surroundings should be insisted upon.

In Painful Affections of the Breast or Abdomen of Women.

℞ Atropiæ sulph.....gr. iv.
Sp. rectif.....f ʒ ss.
Aquæ destil.....ad. ʒ iv.
Misce ut fiat lotio. (To be applied on lint, covered with oilskin or parydor.) *Dr. Tilt.*

In Nausea of Uterine Irritation.

℞ Liq. bismuthi et ammon. citrat..... ʒ ss.
Acid. hydrocyan. dil.....♏ xxiv.
Sodæ bicarb.....ʒ j.
Tinct. lavand. co.....ʒ iij.
Aquæ,.....f ʒ vj.
Fiat mistura. Cap. cochl. maj. ij. bis die.
Dr. Tyler Smith.

In Obstinate Dysmenorrhœa.

℞ Chloral hydrat.....ʒ j.
Sp. etheris.....ʒ ij.
Liq. opii sedativi.....ʒ ss.
Tinct. hyoscyami.....ʒ iij.
Sp. chloroformi.....ʒ ij.
Aquæ.....ad. ʒ vj.
Fiat mistura. A tablespoonful every two hours.
Dr. Lombe Atthill.

As an Anæsthetic During Labor.

℞ Chloral hydrat..... 3 iss.
Aquæ aurantii floris..... ℥ vj.

Misce. A sixth part at completion of first stage of labor; another dose in about twenty minutes; and again in about an hour. *Dr. W. S. Playfair.*

In Dysmenorrhœa.

℞ Succi conii..... 3 j.
Potass. bromid.....gr. xv.
Aquæ.....ad. ℥ j.

Fiat haustus. To be taken three times a day.
Dr. Alfred Meadows.

In Ulceration of Cervix Uteri.

℞ Acidi benzoici.....gr. x.
Acidi tannici.....gr. xv.
Collodion..... 3 iv.
Acidi carbolici.....gr. xxv.

Fiat lotio. To be applied to affected parts.
Dr. Lombe Atthill.

In Pruritus Vulvæ.

℞ Acidi carbolici..... .gr. x.
Morphiæ acet.....gr. viij.
Acidi hydrocyan. dil..... 3 ij.
Glycerini..... 3 iv.
Aquæ.....ad. ℥ iv.

Fiat lotio. *Dr. Lombe Atthill.*

In Menorrhagia.

℞ Acidi gallici.....

V.

DISEASES OF CHILDREN.

Diarrhœal Mixture for Children.

℞ Pulv. cret. aromat. (Br)..... 3 j.
Tinct. opii..... 3 j.
Syr. zingiberis..... ℥ j.
Decoc. hæmatoxyli.....ad. ℥ vj.
Take two tablespoonfuls after each liquid stool.

Farquharson.

Acute Bronchitis in Children.

℞ Tinct. veratri viridis.....m. xij.
Syr. scilla compos..... 3 ij.
Syr. balsami tolutani..... 3 xiv.
M. Sig.—One teaspoonful every two or three hours to a child five years old in the first stages of the disease.

Prof. J. L. Smith, M.D.

When the temperature falls and the moisture appears on the skin under the influence of the above prescription, we may cease its administration and resort to expectorant mixtures as the following:

℞ Ext. cubeb fl.....m. xl.— 3 j.
Syr. simplicis..... ℥ ijss.
Sig.—A teaspoonful three or four times a day.

In Summer Diarrhœa of Children.

℞ Plumbi acetat.....gr. viij.
Acid acet.....gtt. vj.
Tinct. opii deodorat.....gtt. iv.
Aquæ destillat..... ℥ j.

M. Sig.—A teaspoonful every two or three hours to a child of two years. *Dr. Roberts Bartholow.*

Infantile Syphilis.

℞ Hydrarg. bichlorid.....gr. j.
Potass. iodidi..... ʒ iv.
Syr. aurantii.....
Aquæ.....aa ʒ ij.

M. Sig.—Five drops for a child about two months old, increased to fifteen or twenty drops if the disease does not yield. *R. W. Taylor, M.D.*

Dr. Taylor has made this subject his especial study, and his experience has been that the above formula is highly efficacious. It is important to suspend the medicine altogether, from time to time, as the system acquires a tolerance for it.

Nocturnal Incontinence of Children.

℞ Strychniæ.....gr. j.
Pulv. cantharides.....gr. ij.
Morph. sulph.....gr. iss.
Ferri pulv..... ʒ j.

M. Ft. pil. No. xl. Sig.—One three times a day to a child ten years old. *Prof. S. D. Gross, M.D.*

This prescription will speedily relieve the irritability of the bladder, especially if conjoined with such

means as a cold shower bath daily, the avoidance of irritant food and late suppers, the patient lying on the side or belly, and taking care to drink nothing for the few hours preceding sleep, and to empty the bladder on going to bed.

Alkaline Mixture for Nursing Children.

℞ Pot. carbonat.....gr. ij.
Ol. cajeput.....m. j.
Aq. anethi.....℥ ij.
M. Sig.—Three or four times a day. *Fothergill.*

This alkaline mixture will afford speedy relief to infants who have griping pains after taking milk; a condition very frequent and exceedingly annoying.

Catarrhal Bronchitis of Infants.

℞ Syr. allii.....℥ j.
Syr. ipecac.....℥ iij.
Syr. tolutani.....℥ v.
Syr. acaciæ.....℥ vi.
Tinct. opii camphorat.....ad. ℥ iij.
M. Sig.—M. xx. to ℥ j. as needed.

Dr. Farquharson.

Cough Mixture for Infants.

Infants' Hospital, Randall's Island, N. Y.

℞ Tr. opii camph.....
Spts. ammon. arom.....aa fl. ℥ j.
Ext. ipecac fl.....fl. ℥ ss.
Syr. pruni virg.....fl. ℥ j.
Aquæ q. s. ad.....fl. ℥ iij.
M. Dose: a teaspoonful.

Cholera Infantum.

℞ Argenti nitrat.....gr. j.
Acid nitric. dil.....m. viij.
Tinct. opii deodorat.....m. viij.
Mucil. acaciæ..... ℥ ss.
Syr. simplicis..... ℥ ss.
Aq. cinnamoni..... ℥ j.

M. Sig.—A teaspoonful every three, four, or six hours to a child one year old. *Bartholow.*

This combination is remarkably beneficial after the acute symptoms have subsided.

Infantile Convulsions.

℞ Olei succini rectificati.....
Tinct. opii. .....aa ℥ ss.
Olei olivæ.....
Spiritus vini gallici..... ...aa ℥ ij.

Ft. lotio. Rub along the spine.

Dr. Joseph Parrish.

The above will relieve infantile convulsions, and is also an excellent application to relieve the spasms of whooping-cough. Care should be taken to wash the skin with warm water and soap before rubbing in the lotion, so as to promote absorption.

Cholera Infantum.

℞ Cupri sulph.....gr. j.
Tinct. opii deodorat.....gtt. viij.
Aquæ destillat..... ℥ iv.

M. Sig.—A teaspoonful every two, three, or four hours. *Dr. Bartholow.*

Anthelmintic for Round Worm and Ascaris Vermicularis.

℞ Fl. ext. spigeliæ..... ℥ j.
Fl. ext. sennæ..... ℥ ss.
M. Sig.—A teaspoonful to a child of three to five years; or

℞ Fluid ext. spigeliæ et sennæ..... ℥ j.
Santonini.....gr. viij.
M. Sig.—Teaspoonful to a child of five.

Prof. J. L. Smith, M.D.

For the expulsion of the round worm no better formulæ than these have been devised. They are found an effectual means also of destroying the ascaris vermicularis.

In the Delirium of Febrile Affections in Children.

℞ Pot. bromidi.....gr. x.
Chloral hydrat.....gr. v.
Aquæ anethi..... 3 ij.
M. Sig.—Every six hours, for child of six.

Fothergill.

This combination of bromide of potassium and chloral acts admirably in the cerebral excitement accompanying the evanescent fevers of children.

Children's Diarrhœa.

℞ Infus. rhei..... ℥ ij.
Potass. bicarb..... 3 j.
Tinct. cinnamoni..... 3 ij.
Syrupi simplicis..... 3 vj.
Dose. Teaspoonful every two hours.

Farquharson.

In Scarlatina.

℞ Pot. chlorat.....gr. x.
Tinc. ferri perchlor.....m. v.
Syr. zingiberis.....℥ j.
Aquæ.....ad ℥ ss.

M. Sig.—Every four or six hours for a child from eight to ten years. *Fothergill.*

Dr. Fothergill says of the above prescription that in the severe sore throat of scarlatina he has found it of all others give the best and most satisfactory results.

Bronchitis in Children.

A large sinapism or turpentine stupe, followed by linseed-meal poultices properly made and frequently changed, or a piece of spongio-piline soaked in warm water, are good external applications. The child should be kept in bed. Internally, in acute cases, a dose of calomel with or without jalap may be given at the outset, and expectoration should be assisted by ipecacuanha, squill, citrate of potash, senega, and similar remedies. A useful prescription for a child two to four years old is:

℞ Pot. citrat.....℥ j.
Vin. ipecac.....℥ j—℥ ij.
Tinct. camph. co.....℥ j.
Syrup. tolutan.....℥ ss.
Aquæ ad.....℥ iij.

Ft. mist. Dose: one teaspoonful every hour or two.

When the secretion becomes abundant, it should be removed from the loaded bronchi by emetics. Mucous and subcrepitant râles are in young children the

best indications for emetics, according to Bouchut. Powdered ipecacuanha, mustard, alum, or sulphate of zinc are best; Vin. Ipecac. sometimes fails even in large doses. A warm bath towards evening is good practice, and the child often sleeps after it, but chill must be carefully guarded against. If there be much restlessness, small doses of Dover's powder at bed-time are valuable. Should pulmonary collapse take place, stimulants, especially Ammon. Sesquicarb., will be needed, with wine and rubefacient liniments. The diet, at first low, must be improved as the disease progresses, care being taken to eliminate all heavy and indigestible things from what is sanctioned. In chronic bronchitis, where there is less fever, and when the child is already exhausted by illness, the cough will require controlling by such drugs as bromide of potassium, belladonna, morphia, etc. Antispasmodics and anodynes, in fact, take the place of expectorants and stimulants. Sinapisms are still useful, and so are stimulating embrocations. Inhalations, too, of steam or medicated vapors (especially that of creasote) are serviceable. The diet must be light and nourishing, and calculated to restrain rather than promote secretion, and therefore especially limited and defined in the matter of fluids.

In such cases quinine is useful in small doses; or if it disagree, Dr. Meigs recommends the following:

℞ Elix. cinchon. flav..... ʒ ij.
Curacoa..... ʒ ij.
Acidi sulph. dil.....m. xij.
Aquæ..... ʒ iiss.
Ft. mist., ʒ j. secund. hor.

In very chronic cases, attended with persistent mucous râles over the bases of the lungs, astringents, especially gallic and tannic acids, are useful. I have certainly seen benefit from their employment. At the same time some external agency should not be neglected, as painting with iodine paint or gentle frictions with some stimulating liniment. Dr. Stierlin, of Schaffhausen, recommends carbonate of ammonia rather than emetic or other treatment, especially in the broncho-pneumonia of young children and in the catarrhal attacks of infants. The dose may be up to 5, 10 or even 20 grains. Dr. Stierlin by this means lost only 7 out of 150 cases, whereas Rilliet and Barthez consider the catarrhal pneumonia of infants especially to be almost invariably fatal.

It is convenient here to mention specially another plan of treatment, referred to in former editions, as much in vogue in America and on the Continent, but which, since then, has daily gained ground in England and elsewhere, and which is applicable not only to bronchitis, but to most, if not all, acute inflammations, viz., the treatment by the great vascular sedatives, aconite and veratrum viride.

This treatment, according to the evidence of those who have most largely employed it, is most suitable for children over three years of age, whose previous health has been good, and in whom the inflammation is acute and primary. It is a remark of Bouchut's that in the first stage of childhood the material lesions are less purely inflammatory than in the second stage, and the suppuration of the tissues in both less frequent and of a less laudable quality. It is accordingly found

that these powerful antiphlogistics are of less service during the earliest years of life. Besides the age of the child, the period of the administration of these drugs is an important point; they should be given *as early as possible* in the course of the disease, in *small* and *frequently repeated* doses, until the activity of the inflammation begins to subside, the pulse lowers, the temperature falls, and moisture appears upon the skin. Beyond this point it is unwise to push the remedy, as the depression so induced may be very considerable. Dr. Lewis Smith, of New York, recommends the following prescription for a child five years old in the first stage of acute bronchitis:

℞ Tinct. verat. virid.....m. xij.
Syrupi scillæ comp.....3 ij.
Syrupi bals. tolutan.....3 xiv.

Misce. One teaspoonful every two to four hours; the medicine to be omitted, or given at a longer interval, if the frequency of the pulse is reduced.

I have but little experience of green hellebore, but I am more and more satitfied that aconite is a most valuable agent when similarly employed. The dose of the tincture of the Ph. B. may be half a drop to a drop, repeated every hour or half hour until the effect described is manifested. The dose is suitable for a child five years old. When the inflammatory symptoms have abated, the ordinary treatment of the special inflammation and its sequelæ is to be resumed; for example, in bronchitis, expectorant mixtures; in tonsillitis, astringent gargles, and so forth. In fact, aconite and green hellebore thus employed may be

regarded as in a measure replacing the depletions and blisterings of days gone by.

Lastly, I think it always desirable, after children have suffered from bronchitis, broncho-pneumonia, etc., that a course of cod-liver oil or the hypophosphites of lime and soda should be advised for a month or two. *E. Ellis.*

In Chronic Diarrhœa and Passive Hemorrhage.

℞ Alumnis.....gr. iij.—xv.
Acidi sulph. dil.....m. ij.—x.
Syrupi.....q. s.
Inf. rosæ acid.....℥ j.—iv.
To be given every three or four hours. *E. Ellis.*

An Aperient for Children of Three Years of Age.

℞ Potass. sulph.....gr. xij.
Inf. rhei..... 3 vss.
Tinct. aurantii..... 3 ss.
Aquæ cinnam..... 3 iss.
Misce. Capiat ℥ ss pro re natâ. *Dr. West.*

In Scarlatina.

℞ Solut. chlori. (Midd. Hosp.)..... 3 ij.
Aquæ.....Oj.
Misce. Sumat cochl. j. ad ij. frequenter in die pro ratione ætatis. *Sir T. Watson.*

Stomatitis.

These cases are usually easily cured by the use of chlorate of potash in good doses, given three or four times a day, the mouth being rinsed well with a weak solution of the chlorate, or in young children syringed therewith, if the child be too young to rinse the mouth; glycerine of borax may be applied after each cleansing. The stomach and bowels must be regulated; and when improvement takes place, tincture or decoction of bark will be of great use—in fact, the

best form of tonic. Nutritious diet and wine are often necessary, when the child is low.

Chloride of lime is used by M. Bouchut, forty-five grains of the chloride to six drachms of honey, and application made with a camel-hair brush. Dilute nitric and hydrochloric acids are occasionally valuable in obstinate cases as local applications ; acid and bark or ammonia and bark being given meanwhile internally. Dr. Dewees especially recommends:

℞ Cupri sulph.....gr. x.
Pulv. cinchon. opt.....℥ ij.
Pulv. gum. Arab.....℥ j.
Mel. commun.....℥ ij.
Aq. fontan.....℥ iij.

Ft. applicatio. The ulcerations to be touched twice a day with it. *E. Ellis.*

VI.

FEVERS, RHEUMATISM, GOUT, AND MALARIA.

Simple Continued Fever.

℞ Acid hydrobrom..... 3 j.
Syr. simplicis..... 3 ij.
Aq.....ad. ℥ j.
M. Sig.—Every hour. *Fothergill.*

Dr. Fothergill, in speaking of the above formula, says it will probably constitute *par excellence* the fever mixture of the future. It is especially indicated where there is cerebral disturbance.

Delirium of Typhoid.

℞ Antim. et potass. tart.....gr. j.—ij.
Morphiæ sulph.....gr. iss.
Aq. lauro-cerasi..... ℥ j.
M. Sig.—A teaspoonful every two, three, or four hours. *Dr. Bartholow.*

This will quiet delirium and produce sleep in the abnormal wakefulness of typhoid. It may also be advantageously used for these same conditions, viz., delirium and wakefulness of delirium tremens.

Local Application in Rheumatic Pains.

℞ Lin. aconit..... ʒ ij.
Lin. belladonnæ..... ʒ ij.
Glycerine.....ad. ℥ ij.

Stg.—Apply locally over seat of pain. *Fothergill.*

This liniment is especially advised when the pain is confined to the sciatic nerve, offering marked relief. Treacle may be substituted for the glycerine with advantage. A convenient mode of application is to spread the above on a V-shaped piece of lint and place on the thigh.

Fevers.

℞ Acid. hydrochlor. dil.....m. xv.
Syr. aurantii..... ʒ j.
Aquæ..... ℥ ij.

M. Sig.—Give at a draught to a fever patient every three or four hours. *Dr. Fothergill.*

The above acid drink, combined with fresh air and good general hygiene, will be found of more benefit in most fevers than the more powerful remedies of therapeutics, as was sufficiently demonstrated in the treatment of fevers in the late civil war.

Anti-Rheumatic Pills.

℞ Ext. colocynth co.....gr. 45.
Ext. colchici acet.....gr. 30.
Ext. hyoscyami.....gr. 10.
Hydrarg. chlor. mit.....gr. 10.

Mix. Divide into thirty pills.

In Chronic Malarial Indispositions.

℞ Pil. ferri carbonat..... ʒ j.
Acidi arseniosi.....gr. j.
M. Ft. pil. No. xx. Sig.—One three times a day.

OR

℞ Quiniæ sulph..... ℈ ij.
Ferri sulph. exsiccat..... ℈ j.
Acidi arseniosi..... .....gr. j.
M. Ft. pil. No. xx. Sig.—One pill three times a day. *Bartholow.*

In Symptomatic Fevers.

℞ Vin. antim.....m. xx.
Tinct. hyoscyam..... ʒ ss.
Liq. ammon. acetat..... ℥ j.
M. Sig.—Every four or six hours. *Fothergill.*

Where there is general disturbance of the functions, the tongue furred, appetite lost, general malaise and weakness, and where the face is flushed, head hot, and painful, the above draught, in connection with a light opiate at night, will yield marked relief.

Sthenic Fever.

℞ Vini antim.....m. xx.
Tinct. opii.....m. xv.
Liq. amm. acetat..... ℥ j.
M. Sig.—Every four or six hours. *Fothergill.*

This combination of opium, antimony, and ammonia will be found very efficient in those fevers characterized by bounding pulse and violent delirium.

In Lithiasis.

℞ Pot. bromidi.....gr. xx.
Tinct. hyoscyami..... 3 ss.
Tinct. lupuli..... 3 j.
Mist. camph..... ℥ j.
M. Sig.—As a draught at bedtime. *Fothergill.*

In the restlessness and suffering of lithiasis, where sleep must be had, and where opium in any form is to be strictly avoided, the above formula is a very excellent hypnotic. If desired, tincture of cannabis indica (15 drops) may be substituted for hyoscyamus.

In Gout.

℞ Mag. sulph..... 3 ij.
Pot. bicarb.....gr. xv.
Tinct. sem. colchici.....m. x.
Inf. buchu..... ℥ j.
M. Sig.—Every four or six hours. *Fothergill.*

Mercury as a purge and opium as a sedative are often indicated in chronic renal changes, but are ill borne by patients in this condition. As a substitute the above is an excellent remedy. It should be followed by free draughts of water.

In Chronic Rheumatism.

℞ Acid arseniosi.....gr. iij.
Pulv. guaiaci..... 3 iij.
Pulv. capsici..... 3 ss.
Pil. al. et myrrh..... 3 iij.
M. Div. in pil. cxx. Sig.—One pill twice a day.
Fothergill.

Coming from one whose practice was for a long time in a district where chronic rheumatism was very prevalent, this formula is invaluable. It should be combined with general tonic treatment, especially fatty foods.

Diarrhœa of Typhoid.

℞ Argenti nitrat.....gr. iij.
Pulv. opii.....
Pulv. ipecac.....aa gr. vj.

M. Ft. pil. No. xij. Sig.—One every four or six hours. *Bartholow.*

When the diarrhœa of typhoid fever resists bismuth, Hope's mixture and laudanum enemata, the above prescription will often magically relieve. It is also a most effective remedy in the diarrhœa of phthisis.

Malarial Enlargement of the Spleen.

℞ Quiniæ sulphat.....3 j.
Ferri sulphat. exsiccat.....3 iss.

M. Ft. pil. No. xxx. Sig.—Four or five pills during the day. *Dr. Bartholow.*

Or the following is equally efficient, and is sometimes better borne by the stomach:

℞ Pil. ferri carbonat.....3 j.
Acidi arseniosi.....gr. j.
Quiniæ sulph.....℈ ij.

M. Ft. pil. No. xl. Sig.—Two pills three times a day. *Dr. Bartholow.*

In Acute Fever.

℞ Tinct. opii.....m. xv.
Vin. antimon.....m. xx.
Mist. camph..... ℥ j.
M. Sig.—Every four or six hours. *Fothergill.*

In fevers dependent on inflammatory affections other than those of the brain, where there is often delirium, depending on vascular fulness, this formula will be found of great benefit.

Anæmia of Chronic Malarial Poisoning.

℞ Chinoidin.....ʒ ij.
Resinæ podophylli.....gr. iv.
Ferri sulphat. exsiccat.....ʒ j.
M. Ft. pil. No. xx. Sig.—One three times a day.
Dr. Bartholow.

The use of the above formula is highly commended by Dr. Bartholow, especially where there is enlargement of the spleen and engorgement of the portal circulation.

Acute Rheumatism.

℞ Tinct. ferri..... ℈ ij.
Sig.—Twenty to thirty minims every four hours.
Bartholow.

The above form of iron is more especially adapted to the treatment of pale and delicate cachectic subjects. In these cases it diminishes the pain, fever and sweats, lessens the chances of cardiac mischief, and hastens canvalescence, by retarding waste and favoring excretion of uric acid through the kidneys.

In Rheumatism.

℞ Am. chlor.....gr. xv.
Mist. guaiaci..... ℥ j.
M. Sig.—Three or four times a day. *Fothergill.*

In the rheumatism of young persons, often dependent on or at least associated with inactivity of the skin, this is an excellent formula. When there is a history of exposure, as in old persons, the skin should be covered with flannel, and the following may be given three or four times a day:

℞ Pot. bicarbonat.....gr. x.
Pot. iodidi.....gr. v.
Mist. guaiaci..... ℥ j.

In Hectic Fever.

℞ Tinct. digitalis..... ʒ iij.
Tinct. ferri chloridi..... ʒ v.
M. Sig.—Fifteen drops three or four times a day.
Dr. Bartholow.

This will be found to abate the temperature and diminish the sweats in hectic fever.

In Muscular Rheumatism.

℞ Ammon. muriat..... ℥ j.
Ext. cimicifugæ..... ℥ ij.
Syr. simplicis.....
Aquæ laur. cerasi.....aa ℥ j.
M. Sig.—A teaspoonful three or four times a day.
Bartholow.

Gout.

℞ Tinct. colchici seminis..... ....♏ xx.
Potass. bicarbonat.....gr. x.
Aquæ pimentæ..... ℥ j.
M. Sig.—A draught.

This is the standard formula used at the London Hospital for gout.

That used at the University Hospital is the following:

℞ Tinct. colch. sem. .....♏ xv.
Magnes. carb.....gr. vj.
Magnes. sulph.....gr. xxx.
Aq. menth. pip. ad..... ℥ j.

The Rheumatism of Phthisis.

℞ Potass. iodidi..... 3 j.
Fl. ext. conii..... 3 iij.
Tr. opii. camph..... ℥ ij.
Aq. aurant. flo..... 3 iv.
Aquæ..... ℥ iv.
M. Sig.—A teaspoonful thrice daily.

This combination of drugs has been found to exert a markedly favorable influence over the course of this disease. It is the standard formula of the Roosevelt Hospital for these cases.

Fevers.

℞ Quin. sulph.....gr. v.
Tinct. digital..... .....♏ xv.
Ac. phos. dil.....♏ xv.
Aquæ..... ℥ j.
M. Sig.—Every four or six hours. *Fothergill.*

In treating pyretic conditions where the heart is acting feebly and irregularly, and the skin is moist rather than dry, this union of antipyretics with a mineral acid will be very grateful to the patient and highly efficient.

Rheumatism.

℞ Lithii bromidi..... ℥ iij.

VIII.

TONIC PREPARATIONS

The following tonic pills are much prescribed at the Gynæcological clinic of the Hospital of the University of Pennsylvania:

℞ Acid arseniosi.....
Strychniæ sulph..... } aa gr. $\frac{1}{30}$.
Ext. belladonnæ.....gr. $\frac{1}{6}$
Cinchonæ sulph..... .....gr. jss.
Pil. ferri carb.....gr. ijss.
M. Et ft. pil., No. j.

℞ Acid. arseniosi.....gr. $\frac{1}{30}$.
Cinchonæ sulph.....gr. jss.
Ferri et potass. tart.....gr. ij.
M. Et ft. pil., No. j.

The sulphate of cinchonia in these pills may be advantageously substituted by a proportionate dose of sulphate of quinia, the former being used simply on account of its cheapness. One pill may be given after each meal.

Tonic in Malarial Cachexia.

℞ Quiniæ sulphatis.....gr. ij.
Acidi arseniosi.....gr. $\frac{1}{30}$.
Pulv. capsici.....gr. j.
Ext. taraxaci.....q. s.
To be taken before each meal.

Where Anæmia is a Prominent Symptom in Malaria.

℞ Ferri et potassæ tart .....gr. v.
Liquoris potassii arsenitis .....m. ij.
Potassii bicarb.....gr. x.
Tr. nucis vomicæ.....℥ v.
Aquæ.....ad 3 j.

To be taken in a wineglassful of water before eating. *J. O. Webster, M.D.*

Tonic.

℞ One rennet washed and chopped.....
Sherry wine.....O.j.
Macerate for twelve days, decant and filter and add
Acid. muriat. dilut.....
Tinct. nucis vomicæ.....aa 3 ij.
Bismuthi subnit.....3 ij.

M. Sig.—One teaspoonful in a quarter of a tumbler of water before each meal. *Dr. T. G. Thomas.*

This is Dr. Thomas' formula for a digestive tonic in metritis, and its success commends it to all for the treatment of this most frequent malady.

Pil. Ferri. Quin. et Strych.

Outdoor Department of Bellevue Hospital, N.Y.

℞ Quiniæ sulphat.....
Ferri redacti.....aa 3 i
Strychniæ acetat.....gr. i
Ext. gentian.....q. s.

Mix. Divide into 60 pills.

Muriatic Acid Mixture.

Outdoor Department of Bellevue Hospital, N. Y.

℞ Acidi muriatici.....fl. ʒ ss
Tinct. gent. co.....
Aquæ.....aa fl. ℥ viij

Mix. Dose: a teaspoonful.

Ferruginous Aperient.

℞ Magnes. sulph.....℥ ij.
Ferri sulph.....gr. xxiv.
Acidi sulph. dil.....ʒ jj.
Infus. calumbæ.....ad ℥ viij.

Take two tablespoonfuls every night.

Dr. Farquharson.

Mist. Ferri Comp. (U. S. Pharm.)

(*Griffith's Mixture.*)

℞ Ferri sulphat.....gr. 20
Potassii carbon.....gr. 25
Pulv. myrrhæ.....
" sacchari.....aa ʒ i
Spts. lavand. co.....fl. ʒ ½
Aquæ cinnamon. q. s. ad.....fl. ʒ viij

Mix. Dose: 1–2 tablespoonfuls. In preparing this, the sulphate of iron, dissolved in ½ fl. oz. of the cinnamon water should be added last. The mixture should be made fresh when wanted.

"Smith's Bitters."

℞ Tinct. cinch. co.....
Tinct. gent. co.....aa fl. ℥ i

Mix. Dose: a teaspoonful.

Wine of Iron and Citrate of Quinidiæ.

℞ Ferri et quinidiæ citr..... ʒ i
Vini xerici.....fl. ℥ ii

Mix. Dose: a teaspoonful. To prevent confusion this should always be prescribed by writing the word "Quinidiæ" in full.

Strychnia Mixture.

(*Hall's Modified.*)

℞ Strychniæ acet.....gr. i
Tr. cardam. co.....fl. ʒ ½
Alcoholis.....
Aquæ.....aa fl. ʒ ii½
Syrupi q. s. ad.....fl. ℥ iv

M. Dose: a teaspoonful.

The following tonic formulas are very highly recommended by Dr. Wm. Goodell:

Basham's iron mixture, with the addition of fractional doses of strychnia, will be found very admirable in its effects. There are so many indifferent recipes for making this celebrated mixture that I shall here give the one which seems to me to be the best:

℞ Tinct. ferri chloridi.....fl. ʒ iij.
Acid. acetic. diluti.....fl. ℥ ss.
Liquor ammoniæ acetat.....fl. ℥ iijss.
Curacoæ.....
Syrupi simplicis.....aa fl. ℥ j.
Aquam. ad.....fl. ℥ viij

M. Sig.—One tablespoonful after each meal.

The following formula makes another very elegant and generally useful preparation of iron:

℞ Tinct. ferri chloridi.....fl. ʒ ij.
Acid. phosphorici diluti.....fl. ʒ iij.
Spts. limonis.....fl. ʒ j.
Syrupi simplicis.....fl. ℥ ijss.
Aquam, ad.....fl. ℥ vj.

M. Sig.—One tablespoonful after each meal.

The dilute phosphoric acid is added both because it is a valuable nerve-tonic and because it has the property of disguising the styptic taste of the iron; so much so, that children readily take this mixture.

There are two other tonic preparations which we prescribe very frequently in the Hospital of the University of Pennsylvania, and with capital results. One of them is Blaud's pill, which Niemeyer extols so very highly.

℞ Pulv. ferri sulphat. exsiccat.....
Potass. carb. puræ.....aa ʒ ij.
Syrupi.....q. s.

Ut fiat massa dividenda in pilulas, No. xlviij.

During the first three days one pill is to be taken after each meal. On the fourth day four pills are taken during the day, on the fifth day five pills, on the sixth day six; that is to say, two pills after each meal. For three days more six pills are taken daily; then the dose is to be increased by one pill daily until three pills are taken after each meal. On this final dose the patient is kept for three or four weeks, as the case may be. In stubborn cases I have occasionally run up the dose to the number of five pills thrice daily, and have seen no other bad effects from it than

a feeling of fulness in the head. This immunity is probably owing to the conversion of the iron sulphate into a carbonate.

The other preparation is a valuable alterative tonic, for the formula of which I am indebted to my friend Dr. A. H. Smith.

℞ Hydrarg. chloridi corrosivi.....gr. i.—ij.
Liq. arsenici chloridi.....fl. ʒ j.
Tinct. ferri chloridi.....
Acid. hydrochloridi dil.....aa fl. ʒ iv.
Syrupi.....fl. ʒ iij.
Aquam, ad.....fl. ʒ vj.

M. Sig.—One dessertspoonful in a wineglassful of water after each meal.

Anæmic and chlorotic patients will fatten and thrive wonderfully on this mixture. I call it the Mixture of Four Chlorides. It should not be given for a longer period than two weeks at a time.

Wine of Iron and Citrate of Quinine.

℞ Ferri et quiniæ cit.....ʒ i
Vini xerici.....fl. ʒ 2

Mix. Dose: a teaspoonful.

Iron and Citrate of Ammonia.

Outdoor Department of Bellevue Hospital, N. Y.

℞ Ferri et ammon. cit.....
Ammonii carbon.....aa gr. 32
Syrupi.....
Aquæ anisi.....aa fl. ʒ 2

Mix. Dose: a teaspoonful. *Dr. J. L. Smith.*

Lemon Tonic.

Charity Hospital, Blackwell's Island, N. Y.

℞ Cinchonæ sulph.....gr. 30
Acidi sulph. dil.....q. s.
Aquæ.....fl. ℥ i
Acidi citrici.....3 ½
Syrupi.....fl. ℥ i ½
Tinct. ferri chlor.....fl. 3 ½
Aquæ q. s. ad.....fl. ℥ 4
M. Dose: a teaspoonful.

Iron and Cinchona.

Outdoor Department of Bellevue Hospital, N. Y.

℞ Cinchonæ sulph.....3 i
Tinct. ferri chloridi.....fl. 3 2
Aquæ q. s. ad.....fl. ℥ 4
Mix. Dose: a teaspoonful.

Sulphate of Cinchona.

Outdoor Department of Bellevue Hospital, N. Y.

℞ Cinchonæ sulph.....3 i
Acidi sulphur. dil.....q. s.
Aquæ.....fl. ℥ 4
Mix. Dose: a teaspoonful.

Iodide Mixture.

Outdoor Department of Bellevue Hospital, N. Y.

℞ Potassii iodidi.....3 4
Syr. ferri iodidi.....fl. ℥ i
Tinct. calumbæ q. s. ad.....fl. ℥ 4
Mix. Dose: a teaspoonful.

Loomis' Tonic.

℞ Quiniæ sulphat.....gr. 30
Acidi sulph. dil.....q. s.
Aquæ.....fl. ℥ 2
Tinct. ferri chlor.....fl ℥ ½
Spts. chloroformi.....fl. ʒ 6
Glycerinæ q. s. ad.....fl. ℥ 4
Dose: a teaspoonful.

Elixir of Cinchona and Iron.

℞ Extr. cinchonæ fl.....fl. ℥ 1
Ferri et ammonii citr.....ʒ 2
Spiritus aurantii (1:10).....fl. ℥ 1
Alcoholis.....fl. ℥ 4
Ol. cinnamoni.....m. 15
Aquæ.....fl. ℥ 6
Syrupi q. s. ad.....fl. ℥ 16

With the oil of cinnamon and water make water of cinnamon; dissolve in this the ammonio-citrate of iron; add the spir. of orange and the fl. ext. of cinchona. Filter, and add enough syrup to make the product measure one pint. Dose: a teaspoonful.

Iron and Quinine.

℞ Quiniæ sulph.....gr. 30
Acidi sulph. dil.....q. s.
Aquæ.....fl. ℥ 2
Tinct. ferri chlor.....fl. ʒ 2
Dose: a teaspoonful.

Wine of Citrate of Iron.

℞ Ferri et ammonii citratis.....gr. 20
Vini xerici.....fl. ℥ 2
Mix. Dose: a teaspoonful.

Thomson's Tonic.

Bellevue Hospital, New York.

℞ Ferri et ammon. cit.....3 1
Ammon. carbonat.....gr. 30
Tr. gentian co.....
Tr. quassiæ.....aa fl. ℥ 2
Syrupi .....fl. ℥ 1½
Aquæ q. s. ad.....fl. ℥ 8
Mix. Dose: a dessertspoonful.

Dr. W. H. Thomson.

Strychnine Tonic.

Insane Asylum, Blackwell's Island, N. Y.

℞ Tinct. ferri chlor.....
Tinct. nucis vom.....aa m. 10
Aquæ q. s. ad.....fl. 3 1
Mix. One dose. To be taken thrice daily, after meals.

IX.

EXTERNAL APPLICATIONS.

For Fissured Nipples.

℞ Liq. ferri subsulphatis..... 3 ij.
Glycerini..... 3 vj.
M. Sig.—Apply with a camel's hair brush to affected part. *Bartholow.*

In Parasitic Skin Diseases.

℞ Sodii hyposulphitis..... ℥ iij.
Acid. sulphurosi dil..... ℥ ss.
Aquæ q. s. ad..... ℥ xvj.
M. Sig.—As a lotion. *Dr. Startin.*

OR

℞ Potass. sulphureti..... ℥ ss.
Aquæ calcis..... ℥ xvj.
M. Sig.—As a lotion. *Bartholow.*

Chilblains.

℞ Acid. sulphurosi..... 3 iij.
Glycerini..... 3 j.
Aquæ..... 3 j.
M. Sig.—As a lotion. *Bartholow.*

Pruritus.

There are several anti-pruritic powders, which are sometimes indispensable. The most important is that which is commonly called Anderson's powder. It is formed as follows:

℞ Pulv. amyli..... ʒ j.
Pulv. camph..... 3 jss.
Zinci oxid..... ʒ ss.

This must be carefully made, the camphor being reduced to an impalpable powder and then thoroughly incorporated with the other ingredients. It may be either lightly dusted upon the parts or it may be quite copiously rubbed into the meshes of linen lint and then applied. The proportions may be altered, either by increase or diminution.

Dr. R. W. Taylor.

Ung. Hydr. Ox. Rub. c. Plumbo.

Outdoor Department of Bellevue Hospital, N. Y.

℞ Hydrarg. oxidi rubri.....
Plumbi acetat.....aa gr. 8
Cerati..... ʒ i
Mix.

Dr. McKay.

Sulphur Paste.

Outdoor Department of Bellevue Hospital, N. Y.

℞ Sulphuris sublimati..... ʒ i
Ætheris.....fl. 3 3
Glycerinæ.. .....fl. ʒ i
Mix.

Ung. Hydrarg. Oxid. Rubri.

℞ Hydrarg. oxid. rubri.....gr. 60
Oleo-paraffini (vaseline)..... ℥ 1
Mix.

In Parasitic Skin Diseases.

℞ Hydrarg. chlor. cor.....gr. iv.
Alcohol..... ʒ vj.
Ammon. muriat..... ʒ ss.
Aquæ rosæ q. s. ad..... ℥ vj.
M. Sig.—As a lotion. *Tilbury Fox.*

Glue Burn Mixture.

℞ White glue..... ℥ 7½
Water, cold.....O.j.
Glycerin.....fl. ℥ 1
Carbolic acid.....fl. ʒ 2

Soak the glue until it is soft; then heat on water bath until melted; add the glycerin and carbolic acid, and continue heating until in the intervals of stirring a glossy strong skin begins to form over the surface. When wanted for use, heat on water bath until melted, and apply with a flat brush over the burned part.

Ung. Picis Alkalinum.

Outdoor Department of Bellevue Hospital, N. Y.

℞ Liquoris picis alkalini.....fl. ʒ 1
Cerati..... ℥ 1
Mix.

Goa Ointment.

℞ Pulv. araroboe (Goa powder)...gr. 50 to 200
Oleo-paraffini (vaseline).....gr. 500

Melt the vaseline on a water bath, add the Goa powder, stir and heat for about ten minutes; then strain quickly into a capsule standing on ice, and stir briskly until cold.

In the Pruritus of Pregnancy.

℞ Thymol.....gr. xv.
Vaseline.. .....gr. xxx.
Powdered brick clay..... ℥ iij.

Dissolve the thymol in the vaseline and rub it up with the clay. *Prof. Montrose A. Pallen, M.D.*

This is to be applied to the pruritic parts, washed off every day or two and re-applied.

Dr. Pallen's experience has been, that excepting those cases depending on trophic nerve causes, this prescription will always effect a cure. He advises its use also in herpes and similar eruptions accompanying the later months of gestation.

Bleeding Hemorrhoids.

℞ Pulv. aluminis..... 3 ij.
Pulv. camphoræ.....
Pulv. opii.....aa 3 j
Unguent..... ..... ℥ j

M. Sig.—Ointment. *Bartholow.*

When the hemorrhoids protrude, bleed, and are painful, the above will be found a soothing and astringent application.

Emplastrum Capsicum.

(*McCready's Plaster.*)

Spread adhesive plaster with oleo resina capsici, leaving, however, a narrow margin all around free.

Dr. B. W. McCready.

Lotion for Iritis.

℞ Morphiæ sulph.....gr. iv.
Zinci sulph.....gr. iii.
Atropiæ sulph.....gr. ii.
Aquæ destillat..... ℥ j.
M. Sig.—As a lotion. *Dr. Bartholow.*

Sore Nipples.

℞ Aquæ rosæ.....
Glycerine.....aa ℥ ij.
Acidi tannici..... ʒ ij.
Ft. lotion.
Sig.—Soak lint in this solution and apply to nipples.

Dr. Barker.

If the ulcerative process has commenced, it is advisable to stop nursing and paint the nipple with a solution of nitrate of silver, 10 gr. to the ℥ of distilled water.

As a Hæmostatic.

℞ Acidi tannici.....℈ j.
Aluminis.....℈ ij.
Aq. rosæ..... ℥ iij.
M. Sig.—For external use as a hæmostatic.

Dr. Monsel.

Pruritus Vulvæ.

℞ Sodii hyposulphitis..... 3 iv.
Glycerini..... 3 ij.
Aquæ destillat.....ad ℥ vj.
M. Sig.—As a lotion. *Fox.*

This simple combination has proved very effective in that troublesome and annoying malady, pruritus vulvæ and also in tinea versicolor.

In Amenorrhœa from Anæmia and in Chlorosis.

℞ Pulv. ferri sulph.....
Potass. carb. puræ.....aa 3 ij.
Mucil. tragacan..... .....q. s.
M. Div. in pil. No. 48.

Sig.—To be given daily in doses gradually increasing until three pills are taken after each meal.

To counteract the costive effect of the sulphate of iron in this, we may give:

℞ Pulv. glycerrhizæ rad.....
Pulv. sennæ.....aa ℥ ss.
Sulph. sublim.....
Pulv. fœniculi.....aa 3 ij.
Sacchar. purif..... ℥ jss.

Sig.—Teaspoonful in half a cupful of water at bedtime.

Where the disease is due to torpidity of the ovaries, the following may be used with advantage:

℞ Ext. aloes..... 3 j.
Ferri sulph. exsiccat..... 3 ij.
Assafœtida..... 3 iv.

Sig.—One pill after each meal, this number to be

increased gradually to two or three after each meal. If bowels are over-active, return to the initial dose of one pill.

The above formulæ are those used in the Hospital of the University of Pennsylvania, Philadelphia, and have been proven by thorough trial to be most efficient.

In Inflammation of the Nipples.

℞ Emplastri plumbi..... ℥ ij.
Ætheris sulphurici..... ʒ ss.
Collodion flexile..... ℥ j.

M. Sig.—Powder the lead plaster, add the ether and mix them well together before adding the collodion. It makes a creamy mixture, and is to be applied with a brush over every portion of the carefully dried nipples, with the exception of the openings of the milk ducts. *Dr. Albert H. Smith.*

This formula is highly commended by Dr. Smith as a protective application.

Dr. R. W. Taylor's Lotion.

Outdoor Department of Bellevue Hospital, N. Y.

℞ Sulphuris sublimati..... ʒ ʒ
Spts. camphoræ.....fl. ʒ ʒ
Sodii biboratis..... ʒ ı
Glycerinæ.....fl. ʒ ʒ
Aquæ..... ℥ 6

Mix.

Conjunctivitis.

℞ Zinci sulphat.....gr. ij.–viij.
Morphiæ sulphat.....gr. ij.–iv.
Atropiæ sulphat.....gr. ss.–j.
Aquæ rosæ..... ℥ j.
M. Sig.—For the eye. *Dr. Bartholow.*

To Destroy the Odor of Foul Breath, the Smell of the Axilla, and the Fetor of the Sweat of the Feet.

℞ Potass. permangan.....gr. vj.
Aquæ..... ʒ vj.
Sig.—Apply frequently.

It is a fact too little appreciated by physicians that success in practice often depends more on attending to some such trivial affection as the above, than on the successful management of a complicated medical or surgical case.

Carson's Paint.

To Prevent Pitting in Vaccinia.

It has been recommended to touch each pustule with nitrate of silver or camphor, or to bathe the face with a solution of four scruples of nitrate of silver to ℥ j. water. A mercurial plaster formed of

Ung. hydrarg.....25 parts.
Yellow wax.....10 "
Black pitch..... 6 "

has a good effect. Dr. Aitken gives this as the formula used at the Children's Hospital in Paris. According to Guersant, four or five days are sufficient for the application to prevent pitting.

Carron oil is a good application till the scabs begin to loosen; they should always be removed when dry, or they stain the skin permanently. Mr. Marson recommends cold cream and oxide of zinc, or if the discharge be thin and excoriating, calamine mixed with olive oil. Dr. W. Stokes uses light poultices over the face or a mask of lint soaked in glycerine and water and covered with a further mask of oiled silk.

E. Ellis.

Spts. amygdal. amar.....partes 2

---

* *Glyconinum, or Glycéritum Vitelli.*

℞ Vitellorum ovorum.....partes 4
Glycerinæ.....partes 5

Beat or whip the yolks of the eggs, which must be fresh, in the usual manner, pour the liquid into a bottle, add the glycerine, and shake them well together. One pint of cod liver oil requires about 4 fl. oz. of glyconin to emulsionize it.

All by weight. Put the glyconin into a mortar and add the oils to it in very small quantity at a time, triturating the mixture actively and constantly. Then add the other ingredients in the order in which they are named. Dose: a tablespoonful.

Phosphorated Cod Liver Oil.

Bellevue Hospital, N. Y.

℞ Olei phosphorati * (1 per cent)..... gr. 100
Ætheris.....fl. ʒ 2
Olei morrhuæ q. s. ad.....fl. ℥ 16

Mix. Two hundred and thirty-three minims, or practically ½ fl. ℥, contain $\frac{1}{300}$ grain of phosphorus. The phosphorated oil should be weighed, not measured.

---

* *Oleum Phosphoratum.*

℞ Phosphori.....gr. 1
Olei morrhuæ.....gr. 99

This is a 1 per cent solution of phosphorus in cod liver oil, proposed by Dr. E. R. Squibb. It is made with the utmost care, and contains the full amount of phosphorus. If only a portion of the contents is to be used, a few drops of ether should be poured into the vial, before it is again corked and sealed. If a fine film should form on the surface or at the bottom, the oil must be poured out, so as to leave this in the vial. Should this film increase, or much of a precipitate make its appearance, a fresh bottle should be used.

It is best to add the whole contents of a bottle at once to sufficient cod liver oil to be ready for administration. The latter may be kept on hand in full and well closed bottles, which are to be kept in the dark.

When using the phosphorated oil it should always be taken by *weight.*

Cystitis.

℞ Acidi benzoici.....
Sodii biboratis.....aa gr. x.
Inf. buchu..... ℥ ij.
This amount three or four times a day.

Dr. A. J. C. Skene.

This may almost be called specific in its influence in the earlier stages of cystitis, affording rapid and lasting relief. The diet should be carefully regulated, and the skin and bowels kept in active condition.

As an Aphrodisiac.

℞ Ergotin (aq. ext.)..... ʒ j.
Sanguinariæ.....gr. ij.
Ft. pil. No. xx. M. Sig.—One three times a day.

Or the following:

℞ Tinct. sanguinariæ..... ʒ iij.
Ext. stillingiæ fl..... ʒ v.
M. Sig.—Fifteen to twenty drops in water three times a day. *Dr. Bartholow.*

Impotence with Spermatorrhæa.

℞ Tinct. canthar.....gtt. vj.
Tinct. ferri chlor.....gtt. xv–xx.
Sig.—Thrice daily in water. *Dr. H. C. Wood.*

This prescription has been found to cure the above condition so speedily as to commend itself to the use of all medical men in the treatment of these cases.

Treatment of Seminal Emissions.

Bumstead gives the following prescription for its special tonic effect upon the genital organs:

℞ Tr. ferri chloridi..... ..... ℥ iii.
Ext. ergot. fld. (Squibb's)..... ℥ iii.
M. Et. sig.—A teaspoonful in water after each meal.

As a direct means of diminishing the frequency of the emissions, B. recommends:

℞ Potass. bromidi..... ℥ i.
Tr. ferri chloridi..... ℥ i.
Aquæ..... ℥ iii.
M. Et. sig.—From one to two teaspoonfuls in water, after each meal, and at bedtime.

The avoidance of tobacco in all its forms, cleanliness of mind and body, laxatives when needed, and, in a word, attention to the rules of hygiene, are to be strictly enjoined.

Elixir Chloroformi Compositus.

Prof. W. F. McNutt has been in the habit for several years of prescribing Collis Browne's chlorodyne in certain cases of asthma, colic, diarrhœa, neuralgia, rheumatism, hysteria, etc. He states that it has seldom failed to be of some benefit, and has often acted like a charm; in fact, it is a most excellent and reliable anodyne, anti-spasmodic and sedative.

On account of several objections to its use, I have,

after a great deal of experimentation, adopted the following formula as a substitute for chlorodyne, viz:

℞ Morph. mur.....gr. ½
Chloral hyd.....
Chloroform.....aa 3 ss.
Tinct. cannab. ind.....
Tinct. capsici.....
Acid. hydrocyan. dil.....aa m. xx.
Spt. menth. pip.....♏ x.
Syr. sassafras co. ad..... ℥ j.
Dose: 3 j.

This I have named Elixir Chloroformi Compositus, and can heartily recommend it to those who have been in the habit of using chlorodyne. To those who have never used chlorodyne, I may say that they will find elix. chlorof. comp. a most efficient remedy for many purposes and under many circumstances; for instance, in whooping-cough, asthma, emphysema, cough of many phthisical patients, in many cases of hysteria, and especially in many cases of dysmenorrhœa, it certainly has no equal. Given as an anodyne, it seldom produces headache or disturbance of the digestion, as does morphine; or depresses the heart's action, as does hydrate of chloral. In diarrhœa accompanied with tormina, in teaspoonful doses repeated every two or three hours, it generally acts quickly and satisfactorily.

In many cases of diarrhœa in children, a few drops of the elixir, together with a few drops of castor oil and vini ipecac, in syrup of acacia, make a most efficient remedy. *Prof. W. F. McNutt.*

Elixir Simplex.

℞ Spiritus aurantii (1 in 10).....fl. ℥ 2
" cinnamomi (1 in 10).....♏ 10
Alcoholis.....fl. ℥ 6
Syrupi.....fl. ℥ 6
Aquæ.....fl. ℥ 6

This Elixir may be made the vehicle of various remedies which have an unpleasant taste, or are otherwise not readily taken. This form of administration, however, should be used *very* sparingly and judiciously to prevent patients acquiring a taste for "cordials" and alcoholic beverages, generally.

Pulvis Morphiæ Co.—(Tully's Powder.)

℞ Morphiæ sulph.....gr. 1
Camphoræ.....
Pulv. glycyrrhizæ.....
Calcii carbonat.....aa gr. 20

Mix. 10 grains contain $\frac{1}{6}$ grain of morphia sulphate. This formula is taken from Dr. Tully's Materia Medica. (Springfield, 1858, vol. 1, page 153.)

Chronic Alcoholism.

℞ Zinci oxidi.....℥ j.
Piperin.....ʒ j.
Ft. pil. No. xx.

M. Sig.—One pill three or four times a day.

Dr. Bartholow has found that this will relieve the gastric catarrh and trembling, and diminish the craving for strong drink in this condition.

Emetic in Narcotic Poisoning.

℞ Cupri sulphat.....gr. vj.
